

418th Knowledge Seekers Workshop; February 3, 2022 (Quick Index complete workshop ; English Transcription only) Interpretation by KF Brazil

Go on Internet and tell Methi has declared his hand on Messiah;
Universal Community is not so far ahead of man UFOs are matter state travel, not by the soul; Enhancement Unit is gaining weight we have achieved creation of G fields - the systems work; Entered space T; Don't need to wait for 6th of June flight to Moon; Methi declares himself today; MaGrav T - "Beam me up Scotty"; Elevate STM through MaGrav; Standing on MaGrav T&T across U;

Nuclear plasma is not dangerous - it's the plasma of a "nucleus" - Not radioactive; Work of U replicates itself throughout creation of matter in upper atmosphere - solar System and Galaxy the same process - same process in intestines; Speed of electrons same as planets; Rick shows magnets - Deuterium; Completion of knowledge when STM transmutes STC inside; Creation of Heartbeat;

Introduction to Quick Index:

It will take too many pages to summarize this workshop. One of the topics is, that a breakthrough in science has occurred, we have achieved for first time to create gravity in an entity. The EU has gained double in weight without changing in size. We don't have to wait till the 6th of June we have already achieved. The flight systems work, and with this,

the Methi has declared himself, which means mankind has matured to the Knowledge of Creation. The totality of the knowledge means the essential pattern of creation has been taught to man and he enters the Universal Community as an equal.

This pattern is the interaction of M fields to create plasmas. These plasmas are the fundamental building blocks of what we call life - the state of becoming. The M fields and plasmas contain RNA, emotions, memory, intelligence, etc. which is not lost when they divide and split and play the game of creation. This is called the transmutation of the energy of plasma. When their interaction involves fields of Inertia and other conditions, then you get manifestation of physicality. We see this in the upper atmosphere of our planet where matter state of the planet is created. This is the same process in the solar systems, galaxies and universes, and perhaps beyond what we could even imagine. This is the same process that the STM uses to create its physicality. This is the same process used in the flight enhancement units, the MaGravs, and all the systems created by KF. The key to using all these systems is elevation of the soul and connecting to the heartbeat of the plasmas we want to interact with, through our emotions. The sign of elevation is correct conduct and naturally following the ethos of Mitra - think good, speak good and act good.

So the whole thing is so utterly simple, the fields of the plasmas explode out from within us into the glory of the cosmos and all its interactions and diversity - and then comes back around inside us where it began - but with the collection of experiences. The beauty of it is the whole thing is within us. When we discover this, we loose the fear and enjoy the play. This is the birth of us as a soul and the Unicose is our playground. The Messiah is here to help us and show us what love is by example. The process of sharing is how we learn. The time is now - for us to decide what we want to do with our lives. Thank you very much.

Quick Index:

Physical conversion of energy of plasma (PI) in slowing down creates heartbeat (HB) and rotation of planetary system; It's rotation creates interaction with physicality (P) which creates emotion, energies and rest; Declaration of Methi is understanding the work of creation and Creator; Also is for the U Community; New Space reactors gives different options to fly with soul - P - or both;

We are teaching the transmutation of the PI of STM to make the Soul of the Creator (STC) within it; This transmutation is the completion of the teachings; New problem how to deal with interaction of the souls; We create HB of moon and like a lover it pulls us in; Problem with interaction of the souls; New systems can maintain gravity and fields in (whatever environment); Embedded reactors automatically create field strength of Moon; Captain is chosen by his correct conduct; If go to Mars you will be able to manifest as a man there, and walk on surface; We have matured man to understand the work of creation; I accepted my job as Methi thousands of years ago to mature not only man but the whole U; Earth chosen because it's so physical - can prove to UC that they can manifest both P or D of soul; I have already taught enough not only

to man but to the UC to fill in their missing knowledge; Man will be able to understand the knowledge in the future;

I gave you the MaGrav for transmutation and transportation (T&T) throughout the U - but you went for crumbs of electricity; "Beam me up Scotty" - is now a reality through the MaGrav; MaGrav is most powerful transportation system in U; MaGrav makes Star Formation (SF) - STM is the 4th reactor; John in AZ was close - but didn't walk on top of MaGrav - have to create right field energy to elevate the soul; You didn't understand the MaGrav, so now we give you the Vision Enhancement Unit (VEU) to do the same; Today you have been shown the end product (EU is creating its own gravity - weight) ; Any race on earth or in U touches me - I elevate their soul; Today I declare the Methi - the return of the soul - the knowledge - shared equal among all ; I am the Messiah, and the Methi, because I understand the work of the fields of the U, and not in the matter state; Calls on leaders to work with us and we achieve - work against we know how to handle; Ambassador says - some leaders crawl like a dog to feet of Pope;

Understand the teachings, and understand how much of it you haven't understood.

I was ready to take you to the T&T of the Soul of the Man (STM) when I taught you the blueprint of the MaGrav system, but you could not see; There are still pieces missing - man has to figure out for himself; STM has to become so humble that the others feed him - with it to create the heartbeat of existence in the U;

You stand on MaGrav in Vertical EU, same in Horizontal EU; already given it to you; All the systems use the MaGrav;

Go on Internet and tell Methi has declared his hand on Messiah. See what you get, the foolishness of the kingdom of Belgium, or the true kingdom of God, and then we show;

end part 1

Klaus tells his experience in discovering the weight gain of one of the EU; KF has entered creation of gravity, absorption of the gravity using non-nuclear material; We know how to add and reduce weight to the systems; Now we need to connect systems to the emotion of the man; Computers are not fast enough to control EU;

There is an additional energy on top of the matter state. When we tested it in the labs in Austria, we could see a hidden energy showing itself on the equipment, additional fields;

Have asked Iranian government permission to ship nuclear material across this planet; Then we show the true power of the what we call, created PI through nuclear T;

I think humanity is ready to meet its soul, through interaction of the fields of the EU, then man shall commit no crime. As when we raise the soul of one, the others within the structure of the soul of humanity will get elevated by receiving the energy. The whole

human race will become peaceful through the love of Mitra, who is amongst us and has brought that position in time and space;

129 Tesla, which is a huge M field, was created through small voltages of 1 to 2 volts and .5 amps (not megawatts like CERN); Don't be naïve about it - this power within the PI doesn't come from electrical current - it comes from nuclear plasma technology; Nuclear PI T is now exclusively with Iran and Iranian nuclear physicists; Plasma is achieved through nuclear processes; The other scientists call it cold fusion or cold plasma - but there is nothing cold about it;

Everything that is alive has nuclear plasma processes going on inside it, or its structure would collapse; For example, if a piece of wood would not have nuclear PI processes going on inside it, it could not hold its shape and would start to rot, iron starts to rust; It's not what we call nuclear energy or nuclear bombs; We go inside the structure of the nucleus into the plasma - or the neutron whatever you want to call it; The nucleus is like a house and as a nuclear physicist I open the door and show you the beauty of what's in the house;

We showed this in Italy 4 or 5 years ago when we built up a nuclear PI to 129 Tesla; (Remember 129 Tesla is a breakthrough achievement for KF that scientists are ignoring) In the lab we placed 12 reactors and created nuclear plasma by interaction of the plasmatic fields; Not nuclear as in radioactive - it is not harmful; There is no difference between what happened there and the EU; In Italy we created nuclear PI in the open space - in the EU we give it shape and form and can control it; When we put space PI detectors in the EU we might even see up to 500 Tesla in some of these reactors; But it is plasmatic and not dangerous;

We say nuclear plasma because it is easier for you to understand - but to us we mean "nucleus" plasma - the energy within the nucleus - within the neutron; (Remember if someone tries to scare you with terminology - it is plasmatic and not dangerous - it is not what we call nuclear radiation and radioactive - it's simply the plasmatic energy within the nucleus like in nature)

In Star Formation (SF) we always put the lightest element at the top so the others feed it - you get more interactions and release of energy; This was shown in the Chinese reactor;

It's the same if you put the STM on top of the MaGrav system; It has to be the weakest, not the weakest, but less than; It has to give more than to take, which causes it to attract more fields from the PI; This is what we call the elevation of the STM. (2:06).

This is what we call being humble to give, and because you are detached, you don't hold onto, to become heavier - to gain; By giving you become more interactive - more able to give; Again the 129 Tesla was gradually built up over weeks - but we stopped it, because there are a lot of things that cannot be (in the world of science);

The world of science has not understood that the M fields can be amalgamated, and then once you join them, you can again divide them; The M fields are like a family tree and all the relatives are connected to each other through the lineage. It doesn't matter whether you came from an amalgamated or divided field, you are still connected to all the other entities of the same field;

We know what entity connects to all the plasmatic fields of the U (the Creator); We have to understand that the divisions occur by G field forces or M field forces; By looking at how magnets interact and position themselves - in this process the magnets divide their fields to position themselves - even though they have been cut into pieces - you are still connected to the original fields by lineage;

The world of physics has not been able to answer questions about orbiting electrons around a nucleus full of neutrons and protons. For example, is the speed, weight and volume bigger or the same for the electron in the first orbit as compared to say, the tenth orbit. They say they don't have enough knowledge to answer that question. Mr. Keshe says, that we can answer that, because as in the macro so in the micro. By looking at the solar system we see a difference in the smaller planets closer to the sun, than the bigger planets farther away like Saturn. It's the same with the electrons orbiting the nucleus - it can't be any different. The electrons at the outer boundary have a bigger volume and different energy - the same as Saturn does.

If you understand this, and if you create the right energy interference, then you can get what you want from the fields without ever touching the center; Because the center moves on its own and has its own interactions; This opens up a new world in PI T. By controlling the center, you decide the field, the interaction of the bodies outside, and then it creates a different condition. Our sciences like astronomy and cosmology are not deep enough, nor evolved enough to understand this yet; Another example is when 3 planets align with each other - their fields have a direct effect the PI of the center control; Other kinds of interactions will create the field strength of Jupiter or the moon; This is exactly what happens when your soul is inside the EU - the interaction of the soul with the reactors create different effects; The STM with his emotion in the center, can dictate "I want to go to the moon." ;

In the last couple weeks we have entered a new cycle of knowledge sharing; You don't have to wait for the 6th of June to fly, you understand you have already flown; When you loose this fear you understand how to untangle your soul - and how to handle the interaction of your soul with the others;

The field interactions create the heartbeat (HB) and by controlling the HB you control the center of the plasma; To do this you have to understand what you give and what you take, to create that HB, and then you have to understand what's the next step;

Asked if the EU is there to take off the fear (the fear when the fields in your body change and you start to lift from the earth, that fear stops you) can the EU stop that fear?; He said, No, it's your fear, and not the people's fear;

Rick demonstrates on his table of small magnets with 3 larger ring magnets in the center; A lot can be learned by playing with these magnets; Putting 3 small one together allows you to go closer to the center - more stable; This is like Deuterium; These magnets are only 2 dimensional in reality you have to look at it 3 dimensional; Small entities can move the whole structure; Shows how the small magnet was thrown a far distance out of center - this is the propulsion part of the plasma; If you do in right way can create a condition of T&T - we'll teach in time to come;

We can tap into vast energies in the outer rings of the nucleus; When you come towards the Inertia boundary field forces of the sun, you create more matters from the fields, and division of the gravity; In upper atmosphere contact with Inertia converts PI into matter state - same thing happens in the solar systems (SS) and galaxies; Solar Inertia converts gaseous planets into matter state planets; The same thing is going on in the reactors as we see the Tesla's increasing - same process of creation (so is it right - if you could introduce the fields of Inertia into the reactors they would produce matter state inside them?);

It's the same with the SS; The SS started as the interaction of fields within the galaxy; We got the big gaseous planets on outer boundaries like Saturn; As the gaseous planets get closer to the sun, they convert to a mix of matter & gaseous state planets like earth, and then just matter state planets like Mars, waiting to roll into the sun; When they go into the sun the matter state fields loose their strength and are converted to the strength of the fields of the HB in the center;

There is no difference in the world of creation - it's all the same process - (if we learn one process in totality we can understand them all)

When you reach at the boundaries of the plasmatic fields - you can change them into the matter state; You can even convert the D of the soul into the physical condition - STP; But in this case you are exchanging the boundary of the soul with its environment. Here you dictate the Inertia fields field forces for the manifestation of the P;

The sun has a fixed boundary of Inertia in the structure of its solar system (SS); You can reach any ?? but you don't have the knowledge to be able to do this; The same way matter is created in the upper atmosphere of earth, matter is also created at the Inertia boundary of the Solar System;

The sun creates its own Inertia system or Inertia zones. The outer zones have gaseous Inertia and create gaseous planets, the next zone is a mixture of gaseous and matter state planets - what we see on earth, and then the matter state Inertia planet just before they convert into the PI of the sun; The creation is the same - there is no difference; The same thing occurs in the galaxies and so on;

You have the same thing with the STM, where you create the P around it; How you shape your fingers and toes, and when it comes to the brain you have no bone structure, because there is a direct interaction of the matter Gans state (of the brain with the STM); To keep

upright you have brought in the matter state of the bones; Even your intestines are positioned in respect to all the materials inside it, and everything else is developed in this way; This Inertia field conversion to matter is the same in all the structures and organs of our body; For example, the kidneys bring in liquid matter with different things in it, to be filtered and certain material extracted; This is done by creating the MG field from the energy, or whatever, into the matter state to be discharged as urine; The manifestation to matter happens when it contacts the physical condition of the body in atmospheric condition;

We have the same situation in the large intestine and colon. In the intestine, (2:46). we dilute the material through the alkalinity of the stomach to make it into Nano material and Gans's; The stomach acidity is for creation of current; It's the alkaline-ness in the stomach, which creates the Gans's, that start floating in your intestines and releasing energies; The body uses these energies, and what is not needed travels through the lymph and gets converted back into the matter state and discharged through the colon;

The food goes from matter to Gans, then shares the energy around the body through the lymph, and what is not needed converts back to matter and is rejected by the colon, plus whatever got converted into the Gans from somewhere else;

So the process is the same whether the earth's upper atmosphere, SS, or galaxy; It depends what you have decided to manifest in your stomach; It also depends on the intensity of the salt, whether it is the right combination, and if the acid is strong enough to break up the material, so it can be made into a Gans of that material; Find out what salinity is needed by the stomach to convert a pea into a Gans of pea - if it is not enough the body rejects it; (So food is made into a Gans of itself, which is really an energy state and if that energy is not needed by the body, then it is converted back to matter and discharged.);

Surely, it's not the acidity. When you put acid on something it is dissolved into another matter - but remains matter state and not Gans; The acidity helps break up the food so the salt can convert it into energy;

Maybe about 60% of the material coming into the colon is from the waste food, and 40% comes from the lymph conversion; The lymph delivers what is not needed by the body to convert it back into matter state and reject it through the colon;

If you investigate, you'll find materials in the colon, that were not entered into the stomach; Our knowledge is not deep enough to understand, or we just ignore it; These materials come from the 80% of energy we get from the space, it is absorbed through the intestine converted to lymph and the energy given to the body, then converted back to matter;

We have to understand this when we travel into space where we continuously convert energies, but we don't have a point of reference of Inertia, like we did on earth, to convert the energy to matter; Then is there a need for a digestive tract?;

A KS has experience of "grey space"; A lot of people can create fields and feel a sensation of lifting up; One KS lifts himself out of bed when he goes to sleep;
K- I can't tell you I haven't been there, I don't see what you see;
It's not a space, it's the state of the energies you use to create that condition, that might give you that (grey) space, or visualization of that space;

The new generation of children born through the soul will have the knowledge, capability, ability to do things that human beings can't normally do; It will take time for the parents to learn; Would the children look like us, as they are part of us?; But their knowledge is beyond us; One of the games they'll play is to go invisible; They will create fields that go pass their physical boundaries, and they'll become part of the field of the environment, but they still are in the same place; We have to ask them to explain to us how they do it; Our children become our teachers, because otherwise it will be a mayhem; It's not a theory anymore, this is the reality, which is with us and we have to learn it;

If you want to take something from them, they already see the emotion of the soul - they put there hand there to stop you before you take it; We will learn this way of communicating through the soul from them; But we have to teach them much more about the behavior of man, than they teach us about the soul;

These are realities now - not in 10 centuries or when somebody comes and they say it is "the end of the world."; You can't lie to them because they already know through the soul; But if through the soul you really want to help them by taking away what might be harmful - then they hand it to you without asking;

We have entered a new phase of creation; This is part of the manifestation of Methi, understanding to create the generation that does nothing wrong;

They may be created out of perfection of the soul, but they still have the terms of P to live; They'll still cry, run and fall, and break their arms - they will learn their position in the physical D; If the child breaks his leg, as now you would rush him to the hospital - but on the way the leg heals itself, because the structure is already preset to perfection; We showed this with the growing of an amputated toe, and re-growing the brain;

The gift of the birth of Mitra is the understanding of the perfection in the D of the Creator;

If for example, you go in the EU with 20 tumors, but come out with 40 tumors - how come it increased?; Because in your emotion you still want to die, so you speed it up; It doesn't matter you paid a million dollar to go into the EU to get rid of the tumor, inside yourself you still want to die, to be with your dead wife, lover, or whatever; But on the surface you show physically that you are doing something about it to help yourself - but inside your emotion is to die; The system satisfies your emotion;

If you go into the system with the emotion, "I want to elevate my soul, not to die, but to enjoy the presence of the soul of my child," or my lover; Then if your intention is true, you'll find a solution, your body will fix itself;

This is one of the biggest problems, not only for mankind, but also the people of the U; The peoples of the U have the same kind of emotional problems; Emotion is not exclusivity of the man; The universal EU is universal - for all the citizens of the U - not just the man;

The knowledge in these systems is (thousands of years ahead) technically of some races in the Universal Community, and some races are thousands of years behind the man - but now all of you will have the same knowledge; This is how the knowledge should be shared;

I hope with the opening of the KF Spaceship Institute many of you will come and be a part of the research to bring a new D into the elevation of the STM; Rather than coming to make a MaGrav, 2 flying machines, and a jackpot; In the next few weeks we'll make this announcement - let's see how many of you will rush to be a student to bring that change, and make it public, to do it in public, because then the knowledge is shared;

KF is on the verge of bringing these things out, there is much effort going on in the background with many KS in many parts of the world; Educating the totality is the responsibility of all the KS, and to make sure that no man is below another, in knowledge, the level of life, and in the comfort of existence; We are just about to reach that point;

When we declare, that we've become what has been promised (Methi), we'll bring everything together all at once, not in bits; Everything is here and ready for that change; The process has started; It's just knowledge, pure knowledge, and knowledge is love; If you share knowledge you're already in love, because you share your love you don't keep it to yourself;

During Christmas of 2014 we did a test to see if we could stop reactors that were running by focusing our intention on them; They were in Italy, Germany, and Canada. Collectively we decided to stop one of the engines, and we repeated it a second time; We showed through intention, that we can connect to each other and create a condition; Because we worked in the D of the Gans plasma and the reactors were also filled up with Gans's; You can interact with anyone, if you do it the right way; This experiment showed the expansion of the emotion of the man to the D of physicality;

The new generation of the children of man will have this ability; You cross the road, and suddenly a car is coming, and a person is running, they will have the capability to stop the person before the car hits them; They have the ability to inform the emotion of the soul, to retract the body of the man;

Yes - people can join their intentions together even from a distance - by tuning their souls together to create a condition; But you have to understand the limitation, you cannot steal, interfere, or play with people; The only thing which can happen, is for you to give to elevate their soul and knowledge, or if you are lacking, and they give for everyone to have it, then you receive part of that knowledge;

You have to understand, that you are not dealing with what I call, all the voodoo and black magic; You are dealing with the science of interaction of the fields; In this understanding we have to understand all possible parameters of it;

If you create a condition of a set of magnets in the right way, you can create Potassium (K), but what you create the plasmatic field of K; If the body is short of K and you put this plasmatic K near it, it will take from it; But you have to create the condition of the Pl through Nano T, to be able to have elements free to do so;

You work with Gans's to create the condition of fields, by advances in the new T, we make it possible for you to use the STM, now your soul can be part of it and play the game; But you cannot use it to steal from anything;

I have a battle with a KS in a very silent way, they say "I want to die," but on the surface they say, "I want to live," and try to show that they are doing everything possible to live; But there is another way to it - "I want to live to be with the soul of, allow me to be with the soul of." Then I don't need to kill myself to be with. Maybe the soul comes to understand and be part of; This is what we see sits in the background of the emotions; When you work through the emotions you decide what fields you to release and to accept; It's the prejudices, which we have created for ourselves, which damages us and hold us back;

Watching 2 children born through the soul playing together, you see them laughing, but they don't talk - they exchange the joke through the soul; Or without saying anything you see both of them running to the same toy, but one waits for the other one to enjoy, and then takes; You won't see crying, "I want it too," because letting the other one enjoy is more important;

We created a new cycle of life on this planet and it had to be done through the STM; We had to create a new generation, to slowly get rid of the old generation, that it changes, and maybe they will understand;

Q: These kind of things have been in esoteric science of Tibetan and Buddhists and things like that. There has been such things before.

K- Yes, but we never understood the science behind it. Now we understand. We can explain the science, and we can create scientifically a system, that gives us that.

We can create emotion for anybody who goes into our machine; It's not only one man who can do it, and the others can't; It's a science and it's done by field strength - now it's

open to everyone, not just someone from Tibet; Because it is technical and we understand it and can replicate it;

Q: Sometimes we keep things to ourselves, because if we tell someone who doesn't understand they have bad judgments.

K- Learn from me - for years I just sit and wait till they understand - 7 billion of them;

There is no age limit for women to make a child through the soul, because they do not rely on the presence of parents for life, because they know the soul of the parents are with them. In the D of fear of dying, and this is important;

Q: Where does the child grow?

K- It still grows. It will be an interesting time coming .. a lot of people need to learn gradually and go ahead.

Q: .. Comparing the Universal Council (UC) and when one magnet moves, the others have to move. So even one UC has so much power, because when you move, you change the position of the leaders, for sure can change, for better. For sure, it's just understanding and moving them in the way, that you want to move them. Am I correct in what my thoughts.?

K- What do you mean ?

K- Yeah, you see, but this is the problem with observing it this way. Observe which other magnets didn't move. You see this is the P of man looking for things. If you look at one magnet moving, and the other magnets move, or don't move. Look at why didn't the others magnets move.

Emotions are the interaction of plasmatic fields; Why does a mother cry when she picks up a crying child? Does she feel the pain of the child, or does she think "what kind of mother am I, that I couldn't protect my child not to get hurt; We blame ourselves for the condition our children go through; But what is the other way to look at it. Wasn't there a cycle for them to learn something, and for us to learn about ourselves in that emotion?

Q; There are 7 billion of us on the planet, and we have a UC, but we also have the process of what we individually are learning on this planet; As a UC member I am connected to 85 million people in Iran; K- Plus the duck who understands Farsi - cat, bird, and

everything else; This is not the exclusivity of man;

What about the soul of the birds which migrate from one continent to another, which UC member is responsible for them? ; What about the creatures of the U who speak a language that could be the same as French? Who is responsible for them?;

Mr. Keshe's behavior is to allow people to go through their own process, not to stop it, just because he knows what is happening; People always say to him "why doesn't he do something to change it." You can create all the gold and then you don't have to ask KS to help; What I say is very simple, we are here to experience it, once we experience it, we understand it; This is the whole purpose of being here. "Oh, why can't you do, stop yourself, breaking your arm or falling or whatever." That fall, breaking arm, it brings

experience in the physical D, we need to understand how to sort something (out). We have to feel it; You have to experience it - it brings you to the point of maturity;

What happened a year and a half ago with someone close to him, even though he knew what they were up to, he didn't stop them, but watched them complete their experience, while still giving them all the love;

We know these things, we have to experience it; Even he accepted to go through the pain of it; Because you have to, you have to ... ;

The only thing is, that when it comes to the point that, what you give is not being accepted (then you have to do something); You can forgive a lot, you can close your eyes to a lot, but when people don't understand, and they carry on with the same thing, you leave it, because it means they are not ready to receive;

We close our eyes to a lot of things our children do wrong, because we love them so much; but then there comes a point when enough is enough - it's a very human interaction relationship;

Loving someone doesn't mean you have to accept everything they do; There is a limitation to what you can accept, but you never stop loving, it doesn't matter who it is; It doesn't matter what the reason is you fall out with your lover, wife, children, or your neighbor, there is still a level of love and care; It's not like in Italy when they end a relationship, they put all the things you gave them outside your door - that's it I am done with you;

They may have gotten rid of the P presentation, but have they got rid of the emotion of it - that's a different point; What you do is you keep the things they put outside your door and you pray for them, you give from your soul to elevate them. One day they knock on your door, "can I have my stuff back, please." Can I have the whole box, because all the memories are in it.

It's not a teenage love affair, where you bought the teddy bears together and then, when you breakup you throw the teddy bear out the window - it's finished; What about every time you drive down that road you remember that teddy bear going out of the window; How many of us have done these things, it doesn't matter with whom or what in our lives;

We progressively learn to give and to be there for others; It not you accept, and then you reach a point that you don't accept anymore - (if that happens) then it means you haven't learnt the lesson yet; Just because they have taken you for a fool - doesn't mean you'll always be a fool;

What you referred to, we'll open this book very soon in a very extensive interview. KF KS have to know exactly what has happened to the foundation, and it doesn't matter if it is part of my private life; We've setup a live interview and very soon we'll open up the totality of what happened, not with accusations, but with direct data and information;

Then you, as Knowledge Seekers will understand how you have to live my path; What my path brings you, because if you allow things to carry on, then it creates a wrong image of the KF structure and the love and care we give; We are there to protect, care and love and it doesn't matter who it is; It's important for us to look afterwards and see how the things have effected us; How it changed our lives, what were the positive results, and if it is the reason for us to be where we are today; Through all our experiences we become more and more knowledgeable, and then we share that knowledge - be it in our lives, be it in the history of our nations, or the history of our planet;

We killed and killed and killed, and destroyed and killed, and now we had enough - we matured. We were just a bit short of stopping ourselves, but it truly needed the collective energy of the whole members of this planet to do it; Not by building a United Nations that actually creates more wars; But by building a Universal Council and extending the love of the Creator from the UC members to the world leaders and the rest; This is the process we learned;

Now we see how they are scrambling to start a new war, but none of them are prepared to fire a gun, because they want to find a solution. We might see a war in Ukraine very soon; But would it be the way we think it will be? Or is it a push, for another political way?

We need a Russian speaking person and someone from Ukraine to join the UC; Then, if those 2 souls can come to an agreement, the nations and the governments in their whole structure will also come to an agreement; It's a very strange position to understand, but that's how it is - it's an evolution in the knowledge and maturity of man;

Q: First I just want to thank you for all you give to us. The way you present the knowledge to us is just such a proof to me of who you really are. You always present us with the next step in knowledge to expand us, to consider what we never even considered before. But yet at the same time, you can relate to us on the level of humanity;

Q: What might hinder or advance the process of the transmutation of the energies of our soul into that of the Creator?

K- Ourselves, understanding the work of the soul, understanding the truth about the creation.

I have given you a lot of hints and knowledge how to achieve it, but you always looked at it from the point of view of the man, and not from achieving the STC;

You always looked at it in the way, how can I get my soul out of my P; But you never looked at it as, how can I go within my soul and there I will find my Creator; It's the habit of the man to always be greedy, to think of going outwards rather than inwards; (We haven't accepted the fact that we have to look inwards); I referred to it in many teachings, that as you go to the center of the Pl you find the strength of the creation;

Nobody understands, you always looked for what I can do to achieve it; Look within, you'll find the love and the Creator; But how clear are you with yourself to look within, for the knowledge, and the understanding of the knowledge; It's a very simple thing;

Think of this, you can go on top of a skyscraper and jump off to get down faster and destroy yourself, or you can get on an elevator and come down, and enjoy every floor, what's in it, but you know at the end you will get to the bottom;

It's understanding ourselves within, not expanding the soul outwards to reach; The more you expand the soul outwards, the further you get from the point; As I say, look within and you'll find it; What you find is the beauty of the creation and the Creator.

You don't need to release the soul to find it, within the STM you can reach that point. But it is the level of your understanding, and how much you can do it, (and how much effort you put into doing it); It's understanding the science of the reason why we do it, and what is the next level;

We are not a cult. We are a scientific organization; If I create denser and much stronger fields, I can travel faster to further distances in the U;

(The faster my soul travels towards the Creator, I bring it to "zero time" and then I become part of it); This is the whole purpose of these teachings; But with it we produce some toys for you to play with, MaGravs, flight systems and the rest of it; An old saying goes, "I came to find the Creator, but I found the Creator within me," that's the point - if you reach that point you mature to the next one;

Q: So in going from point to point, does our soul have attachments, or is this all in our P?

K- We are connected we are not attached. You saw those magnets, even though they come together, they are not attached to each other;

The matter state is connected, but the M field is flowing through them; They are a line of connection; It doesn't stop where the MaGrav touches another magnet, the fields don't stop going through them;

Q: The STM and STP are connected and they effect each other?

K- They operate through each other, not effecting.

I hope we learned a little bit more, we shared a little bit more, try to stay humble then you'll understand, and you'll achieve a lot; When you look at these EU, remember there is one in the Linz center, which is gaining weight within itself from the D of the Universe; It's putting on weight, but it won't get fatter, but maybe it will become more knowledgeable, and then we'll see what we can do with it. It won't increase in size, we have to measure the field around it one day.

Proofing finished

(:22).

K- ... In sharing knowledge of space and knowledge of man and see where the two can meet, then some of us, and then all of us can be educated to that knowledge, that we all become the same. I asked this intro as Rick suggested to be played this morning, because we are trying to get to the point of bringing a lot of closure, to a lot of teachings of the past, that we can start the new cycle.

In the intro we hear very clearly, that we have taught the knowledge of the space T, if the man decides to travel with the spacecraft UFO, because then he thinks he has become the man of space. Then you have the option. This is mainly what has been opened to most of the Universal Community, flight by containing soul, by containing physicality (P). That has been, that's why you always look into the sky to see, if you see a UFO, or I've seen it, or other things which are centuries, thousands of years, been drawn on caves and every where else. We are not the first generation we are talking about that. This has been the knowledge of the Universe (U). (:24).

Now the teaching about another craft, which can be created using the universal knowledge, then the universe's T, is the understanding of the operation of the soul. Working like a plasma (Pl).

In the UFOs, in the structure of the airplane you have no difference. It's the same thing, carrying masses faster to different position. We used to do with donkey, we managed to do with a car, now we have ... now we have a rocket. And then the next step. These all have been using, fuel from the environment, fuel form what we could get something to do with, feed the donkey, get the motion, move your things. Put the fuel in the tank, get the car driven, put rocket fuel and then now it goes. Now we are looking for a new fuel that we can put in a reactor, build something we call a UFO, and get to the next position, next destination.

But this system is much faster, and has a protection, and this shows that knowledge of the physical side of the races in the U, have not done much more than the mankind. Has not achieved much more, except a system, which now can go faster. We went from the donkey to rocket propulsion, we managed to get a bit more of it, then next step to us, is spaceship, where we introduce a new fuel, Pl T.

But this, if you see the people in UFOs, it means they are more or less the same understanding of the man, a little bit more of positioning. (:26). But the teaching we do, with this, has been all matter fields condition, connection. The teaching of the soul is the way the U works, not machinery.

You cannot land on the surface of the sun, .. a star, because it is a Pl, it creates its own dimension (D), its own entity, .. D of interaction. It's the same with the Soul of the Man (STM). He has his own identity, he doesn't need the physical body of the man, or a donkey or a cat, or a tree.

So when we come to the point of the maturity of the man, you are looking, "oh I have a motorbike at home, when I have money I buy a car," and then when you have money I buy a plane, and now the human race is there, when we have the knowledge, we have the UFO, or a flying object which has been a mystery to us. So we are behind the neighbor who had the money before and bought the car, ... and bought the plane. But this time we are behind the U Community trying to get that better car movement, we call it a UFO. This is all matter state condition of transportation.

Now you realize what we have been teaching in the past year or two year, is a vehicle without the body. But you can reduce the strength of the sun's field Pl, (:28). and create earth with it, we can create Mars, you can create anything you like with it. This is the gift, the knowledge, it's a T which we have been concentrating for you to understand.

When I tell you we teach, not only for the man, but for the Universal Community (UC), they are learning, that the time has come to leave the UFO. We are getting educated, like the humans, to move to the next level of understanding, without encaging, not the bird in the box that we carry it, we call it a bird in a cage, man in the car, UC in the UFO.

So this is what is important for us, now that we are completing the education of man for the manifestation and declaration of Methi, for you to understand what you are going for. It's not anymore, give me another object for to travel, you have the system inside you. It's the part of the way the U works. U doesn't make cars, .. jumbo jets, the U does not .. (The U) uses the fields within it, to achieve what it needs, the position and what we call, its attribute.

When we talk, when we speak about the upcoming of Methi, declaration of man understanding, is that Methi, of the work of the creation - how the U works. When you reach that point of the maturity, do you need the UFO. This is where the teaching of the KF is. You thought we were teaching you about the soul, (:30). but we are teaching the UC the same, they are listening, they understand, that now even them are getting taught to get out of the UFOs, there is another option. I said, when I finish teaching, man will be equal to the others, but the U now learns from the voice of the man, the knowledge of the Creator, through understanding of the work of the Pl.

This is part of what we are here for, and what we are doing. The next system for us to see how to travel without the P of the spaceship or aircraft. It's in-between two. to gain the trust of the soul, at the same time being the physical. We are giving you the enhancement flight unit (FEU), but in a way, that's a step in elevation for the STM to be able to become free.

In the space reactors, which are developed and getting manufactured, now for the enhancement unit (EU), Vision EU, or flight EU, we have accommodated all conditions. You want to fly in the D of the soul, the system is set for it. You want to be in the both D of the P and the soul, its done for it. You want to be in the D of the P, it's built into the system. Many of you, even I just saw the intro (video), are expecting the flight to be on the 6th of June, we are already testing, we have already have first results of development of the T for landing and taking off, we know the system works.

Now we are not waiting for the 6th of June to do the test. We are assembling, we are testing, (:32). we are already going to manufacturing of the reactors. The testing has already started. It's not that, we are going to put the system in the 6th of June how la, la, we going to do, who is going to test it. It's not on the, what I call, Cape Canaveral, you have a rocket and everybody sees when it goes up, or comes down and crashes. Because that's the only time they can test, every time they test in public. Because of the advancement of the T, we are testing in the labs, we are testing with the people who sit, how they behave, how the system changes their emotion. So if you are waiting to see the flight on the 6th of June, the first flights, we have already started the tests. The systems are getting built, the body is getting completed in China, when he arrives in Europe some time in February March, we put the system in it, the minute the systems go in, the tests have started. March, April, May, June. Even though without you knowing, the flight tests conditions, which we understand now, started in the Exhibition Center (EC) a year ago in Linz. The systems went operational, so we've seen it understand it, it's in us and around us, and we learn more.

Our target 6th of June is to complete but you will come to understand the way the KF has worked over years. You are going to be debriefed in a very soft, and gentle way, what happened in the tests, what happened next. What is the next condition. There is a secret within the KF management team, on the top of the structure of the KF. (:34).

Maybe it's time for you to understand how advanced the T is. Because now we can show you, we have measured it, we know it. We know the system works. I hope with the permission of our colleagues in KF, we can open this door, as I said, slowly for you to see, to understand.

You've seen ... 2 units, these 2 units were manufactured in China together, were brought into Linz, it took 2 or 3 months, the team of the KF, who understood, worked on it, and tried to put the electronics and computer control into it. To put it together. We had our specialist with the computers coming to Austria, sitting with the laptop trying to monitor, follow the system. Rick The new spaceship ..

When we brought these units into Austria, we realized no computer system works. We brought our specialist who could track it on a computer. Stanley came and sat on the machine, (:36). monitoring, trying to understand. We found out that ... we are overriding with the T, the Pl, the one (..) What we found out and what we saw (...)

When we brought these 2 systems together in Linz, we weighed them. The systems have equal number of reactors, the systems have more or less everything else except a chair, which in the other one we have the matter production. They all weighted around 950 kg, to a ton. In Linz we set the system to work. If you remember we explained, (:38). that in one of the tests, we created the fields with the communication interaction.

But what we haven't revealed up to today, is that one of the systems started gaining weight. In past year and a half has gained nearly 500 to 600 kg of weight. It keeps on adding to its weight, which means we have achieved creation of G field forces within the structure, for the first time, through a very simple system.

How do we know this. When we came to bring the units from the old EC to the new EC, the .. 1 ton forklifts could not lift one of the EU. So they had to bring additional, or different lift system to be able to lift over a ton. We can lift one of them (the EU), still with no problem, (it's) at 950 kg. We had no problem (lifting both of them) when we installed them. But now one of these 2 children of the man, is gaining weight, and it has gained weight by 600 kg. This is one of the reasons we brought the 2 systems from upper level to lower level, on the ground floor. Because if it carries on gaining weight, it can break the structure.

Now you understand, we are only in the test system, (:40). and we have created gravity. We have created systems, which actually work. This is why we are heading in the direction of the same system for the next level, for the next condition. ... We have come to understand, that we have already entered the space game. We are not claiming, you consent, the weight has been weighed in China before leaving. Same system, weigh the two, and you can see the difference, and still gaining. Dr Klaus are you in background ..

So we have, we are not promising what is going to happen, we have already started the space T. We have managed to gain weight, we have managed to increase gravity, and it can be measured. If our spaceship could go 1 km deep in the water, now we can go 1.5 km, maybe 2 km deep. (:42). This is now, when we tell you, don't wait of the 6th of June, when we develop, we explain, we bring in, what you see as the twin spaceships of the KF, already have start gaining weight.

We have developed the knowledge for the interaction of the fields to create, the condition of flight. This will be part of the work, which we are extending. Now when you go to the EC, where you look at the twin systems, ask yourself, which one of you two are getting fat, .. are gaining, and not sharing. But we know. In the management of KF and people involved in research we already know.

They tell me you cannot keep a secret. I kept the secret from man for thousands of years, now we release, we show you what we call, the secret. Then when you ask me what are, what it is, it's the totality of the understanding of the T. We have already brought you forward without burning the fuel, we have brought forward the knowledge of the man without one thing to be in that game and position. (:44). This is what is on the table of the knowledge today. Your babies, you got excited about the EU, one of them is getting

fat, .. gaining weight. one of them has gained weight and we can physically measure. So when we speak about the space T, we have physically given you that.

But the space travel through the D of the Creator is the understanding of the work of the stars, not mechanical systems of the U Community, including man's rocket propulsion, including UC - UFOs. In the teaching of the creation of the flight of a UFO, we brought you part of the knowledge of the stars, space reactors. But when you look at the creation of the stars anywhere in the U, there is one single thing, stars create their own (Rick ..) We create that condition, because we made you to understand between the two, as some of the races of the U have become to understand, how to interact the fields, but carry an object like the soul and the man. We are teaching you to do the way the Creator does. (:46). The KOC the stars, plasmas, how they are created.

In the communication last night in the interview (Italian radio) I was trying to explain this. When you have a mixture of the P of Gans's you, in trying to get them in communication, you create a flow of fields, that all contribute to, and connect to that they know what they are doing, we call it the blood of the man. In that M field flow of the blood, in getting energy, in trying to energize the P of the body to convert some of the energy to physical D, we create a heartbeat (HB).

We do the same in the condition of the PI, but HB of the PI is different, it is created in a different way, but in a similar way, where the HB of the man created the motion of the heart in turning and twisting. In the PI T, KOC you create rotation. You don't, you haven't seen the sun dancing in the space, but because the HB is continuous, that physical conversion of the energy of the PI, in slowing down, or in interaction with each other, creates the HB and rotation of the planetary system, or even the sun, or even the creation of the STM. Your soul in the center of your body is not sitting there idle and ?? alone , it's a dynamic structure, it's a sun, it rotates, and in its rotation it creates interaction with your P, creates emotion and the energies and the rest.

So when we speak about the upcoming declaration of the Methi, (:48). it's to understand the teaching of the man and the U Community, of the work of the creation and the Creator, that you do not need the D of P. It's there if you want to show it. The sun is there, but when he wants to show his manifestation of what he can do, he creates the planetary system. We have stars, which have no planetary system, they are shining on their own, like the STM. So now you understand, what it means. If you look at the picture on the right hand side, one of these two what I call, "little devils," is getting fat, but he is not showing it. It's storing the energy inside.

On the left-hand picture we are proud to announce that the KF flag for the first time flying across this planet, between the two flags of Iran and state of Austria, where from now on it will be the same way, that all the offices of the KF, will bear the flag of the KF officially as the sign of the knowledge, sharing of the knowledge.

Now we understand how we have brought you into 6th of June flight system already, because we have a system which is gaining gravity. Transport companies are there to

confirm to you, the ?? the system we moved, how they moved. We paid, we know it, and out of understanding how much more it will do (gain), we have brought them to the ground floor. (:50).

So as KF we have entered into the space T creation of gravity landing. Our little babies here are producing it. Now the system for us is to bring the next step in. Try to create the atmospheric condition around it, that allows it to go in a different direction. This is one of the reasons we changed the reactors.

We spent a year and a half, 2 years, to develop the new reactors space T, to become near enough to be able to accommodate the STM, if he wants to fly with the soul, the P of the man, and if he wants to have it in a craft. When you enter the new EU, which are coming from China, and are fitted, gives you all 3 options. Because the manufacturing design and development of the reactors are set to be this way. We designed it, we are fueling it, and we are developing it this way.

This is what the knowledge of the space is. The way the Creator has given the option to live with your soul, or to live in a house, car, in body of man. Now we give you a scientific solution for the same thing. (:52).

I am the Methi, in understanding and sharing the knowledge with the man, that the man understands he has access to both, and not only for the man, what we have taught about the operation of the soul, and how the next steps of understanding and traveling the U and Unicose, will come, will be through the understanding of the Pl transportation and transmutation (T&T), not in the matter state of T&T.

Then it comes a very big question to answer, when you understand, with transmutation of the elements you can make gold out of the plasma of the Cu, out of the Gans of Zn. When you move into the D of the Pl T, where you can transmute the energy. The biggest question for man, or the whole of the races in the U comes, does this means if you understand and mean, and be on the verge, become mature, to understand the totality, would that transmutation of the Pl of the STM, will transmute to become the gold in the eye of the man, which becomes the Soul of the Creator (STC).

This is what we are teaching. Transmutation of the STM, as you made gold out of Cu and Zn and the others, to make the STC within the STM. (:54). I am the Methi. They challenge me I show.

This is where the teaching goes, this is where it has to be clear to the KS. You seek knowledge of MaGrav, flying machines, I seek to teach you the knowledge of being able to transmute your soul, to the soul of your Creator. This is the completion of the knowledge, when the man can understand the transmutation of his soul, to become to the strength and the purity of the, its own creator.

Then mankind can say, and the rest of the U Community can say, the teaching is complete. This is the point of Methi, or Messiah, or whatever you call it, is when we

understand with our own soul, the new challenge, the new opening to understand the energy of our soul, the operation of our soul, to transmute ourselves to be the nearest, the purest, soul, to then become the STC.

You do your best to achieve 99.99% purity in gold. (:56). How much can you purify your soul, in understanding of the totality, that becomes that gold, which is the STC. This is the purpose of 9 years of teaching, as of today. But the Creator with all He has, is still through His work, interaction of His fields, creates the universes, and the galaxies, and the sun and the earth. So man with understanding this point, can create the D of the P as he needs, to be manifested, at the point of the time and the position, and the space in respect to time and position. Then does the time exist, unless you decide as soul, manifest in D of P in that position.

It's very interesting when you don't understand and your knowledge is not there. Yesterday I had to give some papers to a lady, translation of my birth certificate for documentation for what is to come. And she read in English 1337, because I am born in Iran, 1337. She looked at it and said, he is not that old. Today is 2022. I looked and I said, my dear I am that old, many more.

The knowledge is what we understand and what we comprehend. (:58). We have taught you every step. You are happy with a UFO. We make it even smaller, much cuter, .. effective, this is knowledge of T&T of the soul too. If you want a donkey, our friends go to the Zoo and get on a donkey and they pay for it. Go to the Zoo of the man. You want the knowledge of the creation and the Creator, work with us. Work with yourself, understand the working of it.

One of the biggest problems, which will come, and we have to face it, and we have developed it, even we are changing part of the reactors in the T to meet this, is the interaction of the souls. Interaction of the plasmatic fields with each other, how to accommodate. In the new EU, when you look at these, the systems are outside, as we said, the new ones are inside. In these old ones it was very hard to create the conditions of the soul and maintain it. But we can create the condition of the gravity and the fields and maintain it.

In the new systems you have an option in the control, (1:00). that you control it with the emotion of the man and the soul. The transportation with new systems plays totally different game, works with the HB, works with the field interaction. As I said before, when we want to go to the moon, we create the condition of the HB of the moon, plus its field strength, and like a lover, just pulls us in.

If you wonder why one of these reactors is setting itself down to increase gravity, is because the system was set to be balanced. Now we can create mis-balance (imbalance) in our new systems, new T, with implication application of the different structure working of the HB and the fields. When we want to go in the D of the totality, if this is your EU, and the moon and Mars is there, and planet Zeus here. The intention of the man, or the soul within the system, wishes to be on the moon, the system embedded in

direction of the moon, (1:02). automatically creates the HB of the moon, plus the field strength of interaction. Where in the amino acid (AA) of the man we call it a Carbon.

There is a second passenger onboard, she likes to go to the Mars, we have one captain, we are here to serve, and understanding that serving is to be able to give what is needed, according to what is agreed. The interaction of the soul of the passenger, in his wish, understanding of the STM, with the cooperation and interaction of the HB of the system, chooses destination of it.

Go back to teaching of couple weeks ago, I said how do the M fields divide, and what strength decides, what is to be divided. Is it enforcement, or is it accommodation? You might force yourself in, but the condition will accommodate what you can have.

The new EU flight system (FS) carries what we call, (1:04). interaction field system, very much like the vision system, where the pilot sits it, and the emotion of the interaction of the pilot with the system, connected to the body, decides the wishes of the captain.

The captain is chosen by his correct conduct, cannot harm and is there to serve. Because the soul is committed to that level, he'll never go wrong. This is the mechanism of working of your new FEU.

As the system is set to work with the soul, will be there, if you decide to manifest yourself as a craft on the Mars, other systems will facilitate the physical manifestation. If you decide to manifest yourself as a man on the Mars, the system will create a field for you to be able to walk it. If you decide, that on Mars you want to see how you look, the system will take it away, and allow you to manifest yourself in the shape of the man on Mars. Because even on Mars you are still connected to the system, which brought you in. (1:06).

Then don't wait for 6th of June to see the flight anymore. Go to the EC and see a system, which is wants to be a submarine in the world of the man. We haven't dictated to it, it's the way it dictates itself to it. We have already started the journey to space, but what do you want to see, and what do you want to understand? How much are you open to understand the totality? To what extent are we ready to understand, and adapt to the new condition, to the new understanding, to the new comprehension of the system, facilitated for man to travel in any shape, or .. way, using one integrated system, which is the EU. You want a spaceship sits there, you want to travel with the space of the STM, or instead you want to travel in D of matter state. This is what, (1:08). will come to be part of the work of the KF EU and FS in the coming time, in the months and years to come.

For the first time not only for the human race, but the UC all 3 have been made manifesto. It's the time of manifestation of Mitra. You will decide to be with the soul or in the D of P of its manifestation. In totality, we have matured the man to understand the work of the creation and the Creator.

As a Methi, my job, which I accepted thousands of years ago to mature man and the U, not only the man. We chose the planet earth, because it is so physical, that we could give an surety to the UC, that it can become P if you want to, or you can be the star without P if you want to.

The problem is how much we mature in understanding of our work, and the work of the creation. How much, that man will have in understanding the totality, because today sitting here, I know, that I have taught enough, not only to man but the UC, what they were missing in their knowledge. Man in the future will be able understand.

I gave you the MaGrav system for T&T in the U, and you went for the crumbs of, (1:10). how many mille volts. If mankind understands the work of the MaGrav systems, the true work of the MaGrav system. Human race has a joke, but now it's a reality. On it, "Beam me up Scotty." I gave you one of the most powerful transportation systems known in the U. We taught you for a long time about the Star Formation (SF), SF for you can be this. The SF still works the same, but in the 4th one, and the 4th one is the STM. Now you understand, still ask for MaGrav to generate 1 or 2 watts, and what you missed. By stacking the 3 systems on top of each other, we centralize the forces, and the STM will decide its position.

If you could understand this, you saw it 3 - 4 years ago when John in Arizona (AZ), walking amongst them. But did you go over them, and did you create the right field energy to elevate the soul. All we done now, you couldn't understand this, we have created you the Vision EU. (1:12).

When the handicapped child cannot play with one toy, when is needed for elevation of his physical movement. We make another toy, which does the same. But we'll achieve the end result. This is what the KF T is, and we battling with you as KS, because you don't understand, you could not understand, you could not see the end product. Today you see the end product, then you understand.

Anyone, any nation, any race in the U tries to touch me, I touch their soul. The elevation of the soul will elevate into where they should be. But we still let the man do his childish things and battle their own way, to find their own way. Because when you give it to them free, and they don't do anything for it, they have no respect for it, they become again animals in the space.

The human race is not the first race, which went wrong, we have corrected all. That's why we know how to handle it. And man, the last race we have to wipe out from this structure, that the U becomes a peaceful place to be. We had in the past, races worse than the man, killing and destruction of, not only on their planets, but in the stars and the galaxies. We tamed them. Man is not a difficult job to do.

But we set to understand the evolution, how over thousands of years, millions of years, this misconduct this misfit-ing comes in. Now we understand it fully, (1:14). and we can

take care of it, by understanding, by elevation of the soul of the planet, in interaction with the STM. They are both guilty in each others operation, and not just one.

We have to elevate the soul of the planet through all these Gans systems, you don't understand what you are doing, but you are producing in the energy increase, the way you put the Gans's on your body and you see the pain goes. By production and increasing the mass production, and increasing Gans's we are elevating, we are changing that pain from inside the planet. You will understand soon, how and why. Then we do the same with the man, which is the STM. We always tried to fix one, now we fix both, that they need fixing anymore, because there is no reason to change.

Playing the game of T&T of the fields, in the D of the Pl, is the game of the creators, and the wisdom of the Creator, and the wise men of the U, which are part of this structure of the creation. Now we teach the same, not to man, but to the U. As I said before and I repeat again, when I teach, I teach to the UC and not to the man only. Now you understand why.

Because the knowledge was one step ahead of you, just a little bit more, they moved from the rockets into D of fields, in the matter state of the Pl. We had to educate them at the same time, to be able to understand the T&T of the fields of the U, (1:16). and not the interaction of them, to create the motion and position and speed.

Now you understand, as I repeat and say many times, we take man into UC not to be subordinate, but to be equal. Now you are equal. You cannot make a servant out of yourself, because your soul has been taught, the same as them. Interaction of the fields understanding of the totality of the operation of the fields, is the name of the game.

But when you are alive you can't sit in one corner and do nothing till the soul opens up and whatever. We play these games of teaching. You play the game of working, .. of whatever, and when you get fed up you do another work. Now you have the option with the STM. Now you understand transmutation of the STM is to become gold. That gold is the balanced fields of the work of the STC. What would you like your soul to be transmuted to, or you work the D of the perfection, or you still can be happy, build your UFOs and play with the MaGrav, which don't work, and the rest of it.

The game changes for the mankind, but we have changed the game today. You do not need to wait till the 22nd of February to understand the declaration. We have declared our hand today. (1:18). We like to see how much the human race will make progress, to understand the transmutation of the fields of the U, and in interaction with the STC.

You made the M fields of the moon and the heart of the moon, to travel from earth to moon on the 6th of June. We have taught you to find the HB of the Creator, and travel the fields of the U through your soul, to reach that moon, which is the STC, and become part of it.

This has been the fundamental teachings of the KF from the outset. The communication facilities of today has allowed us to teach all men in one go, and not some man who abused it, like the Moses, when it came to translating and transferring.

I am the Messiah, and the Methi, and whatever you want to call it, because I understand the work of the fields of the U, and not in the matter state. Now you understand why the teaching has been going on this way, and how we have been educated you to that point. The rest of it, what happens when you mix this Gans with that Gans, is the play, is the pleasure of understanding more about the process of creation, nothing else, nothing more.

We still make you the MaGrav systems, .. EU, and the rest of it. But you have the capability and the ability on your own, to reach to that point of wisdom, if you don't have the T, (1:20). of the EU or the MaGrav. It's the clarity of understanding of interaction of the fields of the U, and then you mature to totality, irrespective of time, position, and place.

We throw the gauntlet, and the leaders of this planet, work with us we achieve, work against us, we know how to handle. We make you to follow by your own soul, we lead your P to march. It's yours to stand proud and not to grovel and crawl. As I said before, a good friend of mine used to be an ambassador to Vatican. He said, to me, Mehran you have to see when some of the world leaders come to see the Pope, they don't walk, they crawl like a dog on the floor to the foot of the Pope. They don't see themselves that high. With us we all walk proud to our soul, and P to understand the totality, we don't need to crawl to no one. We don't need to beg to no one, as we are part of the creation and Creator, if you understand the power, the strength, and the beauty of the life of our soul, then the P.

It was good to give you a date, that something might happen, that day is today, manifestation and declaration of the Methi, and the Moses, return of the Christ, in any name you like. The return of the soul, not the P. The return of the knowledge, and not what we call the possession of knowledge, but to share it in equal measure. (1:22).

You have all the facilities and the systems to do and you got to understand, by declaring our position clearly we expect, habit of the man to create problem, but that's for them. We shall prevail, and our knowledge is shared equal amongst the UC, and man better follow fast, if he does not want to be again, the one which left behind, because of his own lack of courage, and what I call the stupidity, to be always subordinate. There is no time for kings, and there is no king, but him. The true what we call, STC.

Understand the teachings, and understand how much of it you haven't understood.

I was ready to take you to the T&T of the STM when I taught you the blueprint of the MaGrav system, but you could not see, you could not understand. Maybe the picture on the screen shows you what you have missed.

There is still pieces here missed, (1:24). we haven't put in to complete that T&T. It's for you to do. Don't forget the secret in this, is this red spot (STM). The law of PI tells you the weaker gives, takes, or receives, from the stronger. The STM has to become so humble, that all systems feed it, and with it, it feeds back, to create the HB of existence in the U.

If you look at the picture of the Vertical EU, (Rick ..) or you look at the Horizontal EU, we have given you this, but you don't see it. (Rick)

What I teach you is here (MaGrav in bottom of VEU - you stand on it) I taught you this 6 - 7 years ago, and you didn't see it. And what I taught you today, is in this system built. (1:26). We're not coming up with fairytales, we show your lack of understanding. Can you show me the .. Horizontal units please (circles a MaGrav system at the bottom - persons stands on top of MaGrav). Now you understand when I tell you, you went for crumbs. These (MaGrav) units are there to transmute man across the U. You are standing on it. If you look here, (MaGrav is at the feet and above head in the Horizontal units) the same. In a different shape and forms. We haven't changed anything ?? the time, we just show you how much you missed the time. Can you show the first black EU pictures if you have with you. Now you understand, we haven't diverted from teaching, it was you who was too greedy and did not see. In everything we have developed, we have put in the MaGrav units. Or we have embedded within the center. (1:28).

The knowledge is the same, it's how you apply it for what purpose. This is the beauty when you understand the knowledge of creation (KOC). I give you the clay, do you want a cup, a plate, a flower vase, or a soup bowl, essence is the same clay. The knowledge is the same. What do you want to do. I can use the same Vertical unit as you see it here, and manifest the creation of the Creator, what has been created in the U. They come in-between and they manifest themselves, if we manage to create the right strength, field strength in our MaGrav system, that creates that in one of the fish tanks. I am clever, I know how to hide, that you can't see, but I am not a magician.

Go on Internet and tell Methi has declared his hand - "I am the Messiah." See what you get. The foolishness of the kingdom of Belgium, or the true kingdom of God, and then we show.

Man is equal in any race, shape, or form to his own race, and is equal to the other races in the U. (1:30). Not better, or not worse, it is him who chooses the level of the knowledge, but in soul, it is all the same.

Thank you .. for being there to understand what is there to achieve, for yourself and no one else. We create the facilities to teach more, that more people understand. We share KOC, and understanding of the scientific basis, not on the rhetoric, and just, just because we say so. The only person who can steal from you, is you, and nobody else. We go to break and come back if there are answer question regarding the soul or transmutation of the P, or the systems we answer.

>> **BREAK** >>> 418 KSW Feb 3, 2022 (1:36).

K- Can you see Dr. Klaus Priler on the panelist ..

Klaus would you like to explain about the weight gain of the system, how it came about, and what it is, because you are literally in it? (1:38).

Q: Yes sure, no sure. I could talk about this for hours, because we had this problem when we moved the unit. I wouldn't say problem, because it is beautiful to see. .. We found out one of these 2 units nearly doubled its weight after some weeks, when we were working with it. We found it out when we were delivering the units from one EC to the other one. Because we moved the units there, with the forklifts first. ..

.. the crane could measure the weight of the unit ... (1:40). .. more than 1 ton.

We are already over 1.5 tons ..

We found out yesterday it has nothing to do with the matter state weight of the material with the weight of the platform. It was the operation of the fields. (1:42). This was opening a lot of eyes of everyone of us .. .

K- Thank you very much. Klaus is responsible for all this, what you see, operation and design, and delivery of the systems to the KF around the world. ...

Now you understand how precise and exactly we have entered the PI space T. It's not theoretical, it's by measurement, knowing, understanding and in a way, we paid for 900 kilos of material shipped from China to Austria, these were weighed international, and we paid for that weight, as they measure every box prior to shipping. This is what you understand, that you have already entered space PI T.

The new units coming in have the additional touch, additional T, which has advanced so much, and has gone inside the walls, to be able to accept command and control by emotion and thoughts.

They tell me, you say don't go and say anything, and then you go and tell it. I tell it .. when it is a right time for it. Now you understand, (1:44). KF has entered creation of gravity, absorption of the gravity using non-nuclear material, two years .. when the systems were delivered into Linz EC, and then more to the new KF spaceship center. It's the beauty of knowledge and understanding it.

I wrote to John, .. when you receive it I want to know how much it weighs when our team finishes installation. He says, I have nothing to weigh (it with). I said, find a way, it's sinking or you are swimming. If you go back to the very first videos we showed (Rick ...) where we showed the weight reduction .. from 9 kg to 6 kg ...

If you look very closely, you see underneath of it, an extra blue piece. We had in the old EC to the (building) structure, that they don't takeoff, or pull themselves to the other position. Because there were two of them, if they created the fields they would move each other. We were expecting interaction, (1:46). .. fields, but now we see it in a different shape or form.

My dear KS we have already entered the space T. We don't need to wait for the 6th of June. It's for us to complete the T, that you can go. (...) 9.1 kilos then using the same T but this video reducing weight. We showed in Belgium some 10 years ago, how to loose weight. We show in Austria how to gain weight, so we have the knowledge of both.

So we know how to take off, and to gain, now we have to connect it to the emotion of the man as a captain. .. the interaction is so fast that we have no computers to do it, (1:48).

There is additional energy on top of the matter state. When we tested it in the labs in Austria, we could see a hidden energy showing itself on the equipment, additional fields. We know now, and we know how.

We have reached out to the Iranian government nuclear scientists to allow us to ship nuclear material as part of the PI space T across this planet, with the permission of the governments, and it takes some time for us to do it. Then we show the true power of the what we call created PI through nuclear T. I came in as a nuclear physicist and I went in and I understood the PI, and I became a PI physicist. So .. we know the path, and we show it in this small reactor in Tehran and tested in Belgium.
.. we have a clear evidence on gaining weight too.

So we have achieved both M and G in 2 different stages, 2 different parts of the world, and 2 different scale of work. When you look at it, we have attached any megawatt power stations to these systems, and no .. hidden things .. it's in open in front of you. It's the way the system works.

I think humanity is ready to meet its soul, through interaction of the fields of the EU. (1:50). In that point, man shall commit no crime. As when we raise the soul of one, the others within the structure soul of humanity, will get energy from it and get elevated, that the whole of the race becomes a peaceful race. Through the love of Mitra amongst us, has brought that position, and the time and the space.

Any other question.

There you see the weight reduce from 9 kg to 7 with a very little touch of gases. and you see to 6.5 kg. The minimum we could reach with this machine was 6.3, because it started lifting, you could not measure the scale, because the separation would not sit on the pad, M fields had different interaction, so the P was there, but the field forces are not there. So you get that separation, what you see 6.3. When we reduce 30% of the weight

by M fields interaction, (1:52). we start seeing field interaction of the plasmas. It's a rough guide.

Q: Stephanie .. first I want excuse from yesterday interrupting you. (K- Don't worry we got used to it, if it doesn't happen there is something wrong) (she makes excuses ..)

K- Just one second. If you look at the digital numbers you see we are using 1 - 2 volts, less than an amp, that kind of thing. We are not talking about huge voltages. If you understood this, you understand how we managed to reach 129 Tesla. .. very little fluxes, and energies, but massive powers. This shows and teaches you planetary systems do not have a heavy center, very light. You can see 6.1 from 9.1 30% rate loss. This is when the field interactions come in, you can see .5 amp .. 1.6 volts. But the energy from this comes from the nuclear PI T. Don't be .. naive about it. The power with this T comes from PI nuclear T, not from electrical current. (1:54). Carry on.

Q: This was one of the questions I wanted to ask yesterday to explain what is PI nuclear T. .. ?

K- Plasma nuclear T is a PI created through nuclear interaction. PI T is at the moment exclusivity of Iran, and Iranian nuclear physicists. Because we never went in any of the works with American, with the Russians and the rest, to understand the process of achieving PI through nuclear processes.

They called it a cold fusion, and a cold plasma. It's nothing cold about it, it is natural PI process. It happens in our body, .. in everyday life, even when you look at a piece of wood standing there, it still has that process going inside there, to keep the shape of the wood. If it didn't have it collapses, the structure collapses. So anything you see which stands, has a life, which exists, has a nuclear PI process inside it.

The minute that changes, you see, you call it, "the wood has rotted, and the iron has rusted," and the rest of it. To a new D again with the PI T. We go within the structure, from nucleus into PI. Not nuclear as a bomb, and an energy. (1:56). We call it nuclear as a nucleus as a center, we go inside. Nuclear or nucleus, or neutron, whatever you call it, depending on the shape and size, and number of things in it. It's a house. With the new knowledge, by being a nuclear physicist, I just opened the door of the house, and see the beauty what's in the house. Nothing else.

We can explain all of it. As Rick shows the process in, what we call, the Inzano, the measuring of the fields, which many of the Knowledge Seekers (KS) over weeks monitored it, as it built up .. to 129 Tesla. It wasn't done there we are in the picture (on the screen). I remember it took 2 or 3 weeks. KS around the world were saying, "oh, it gone up by 1 Tesla. Oh it's gone up by 2 Tesla." We built it up. The same as we done in the system in Linz. We built it up, .. to that point. We built it up by understanding a nuclear PI T, by using all of it, when you look at the setup of the reactors in the Inzano, 4 or 5 years ago. It's a combination of the reactors of different field energies, which created a nuclear interaction PI.

This is something any of you understood. I don't think any of you understood at all what it means. By placing 12 reactors, (1:58). in this environment, .. of the lab, we created it between the reactors, interaction of the plasmatic fields, which lead to creation of nuclear Pl. Which means the energy, which is within a nucleus, **not a nuclear - as in radioactive**. Which means the 3 reactors became the boundary of the, creator of the boundary of the what we call, plasmatic field.

If you understand this, and look at the EU, it's the same thing, it's no difference. We created a "nucleus" Pl. Now we gave it a shape, we can control it. It's not in open space, the way we had in the Inzano. As you do not understand fully the T, everything looks to you like a different puzzle, different thing, but essentially the whole knowledge is the same. We just make different things with it. I am sure when we put the space Pl detectors, we might even see 4 or 500 Tesla in some of the operation of the reactors in the EU. But it is in plasmatic, which means it is not dangerous.

You call it a nuclear Pl because it is easier for you to understand, easier for us to communicate with you. But to us it's a "nucleus" Pl, it's an energy within the nucleus, within the neutron, which that, what it counts. (2:00). This is what matters, and that's what counts for it to be.

Q: So it's like the earth, it's the center core, it's the nucleus. ... this connected again to the MaGrav, there are 3 lines on top of the other, and then you put the man on top. I remember ... you drew Infinity Loop horizontally, and then vertically, and then you said, that Pl .. it's like the Aex beads you can create continuously energy, where the middle gets strong G, to keep .. to contain the fields like the earth. That 3 on top of the other reminded me .. why when we do the Mozhans.. when we do the 4 , 1 has to higher, but 3 people have to be at different (height) level. .. Because the 3 people, (2:02). they create the MaGrav .. why did you told us to be off the floor ... I thought that was the reason .. but to keep the core .. yeah this it, the 3 become 1, then you created the N and S Pole and it's got an endless repetitive feeding of the core. Today you drew the MaGrav and put man on top. ..

If one person put around themselves 3 MaGravs, they could replicate what we replicated in the Mozhan ... I am talking like a train now.

K- Do you want to stop the train.

The fundamental point if you look at the MaGrav, where, or if you look at, (2:04). the Star Formation (SF) which we made from the beginning. Has been to by building the base, and the what we call the top , we always fill the top with H, or the lightest composition. Because in a way, the atomic matter state is the lightest, but then the strongest, more of, will feed it, and it creates .. field transformation, and transmutation.

But this is something which again KS, you are not nuclear physicists, .. is when you have the lightest and the less, you have more interaction. You have more energy releases, because you have more to interact with. This is where you can divide the fields, where they said up to now, they said, M fields cannot be done anything with. We could double it

electromagnetically by transformers, but then divide it, the way we do as a PI, is another game. By, we showed this one in the Chinese space reactor test clearly, how what one reactor on the top, specially loaded, we could create flow D, and it's the same.

Now with the STM on top of the MaGrav system is the same, it has to be the weakest, not the weakest, but less of, more to give then to take, that attracts the fields from the PI. This is what we call the elevation of the STM. (2:06).

This is what we call to be humble to give, because you are detached, nothing is holding onto, that you can hold to, to hold you back, to be heavier, to what we call, gain. By giving you become more interactive, and more .. able to give.

One of the points in the world of .. PI physics, .. Here if you look .. is the process of gaining Tesla fields in the Inzano in 2014, where you saw it gradually going to 12 to 14, we are building up the PI fields in Tesla's. We started with more or less, very small and this number after weeks, she reached 129 Tesla. We stopped it, because there are a lot of things that cannot be, but that's how it is, you see a gradual buildup 12 to 14 then to 16 and the rest of it.

But ... the position is, what has not been understood in world of science of the PI, or the physics in respect to the M fields, is that how you can amalgamate fields. Then once you amalgamate them, (2:08). in the system, how to divide them. It does not matter where you came from, and how you are connected to , how you connect to the other entities of the same fields.

We know what entity connects to all the plasmatic fields of the U. How do we do this? How this process is done, is part of understanding the process of division by G field forces (FF) or M FF. If you divide through G field forces what happens, and what happens if you divide by M FF, what happens? How and where does this division come? How can we create a division? But in a way if you look at it as part of the understanding, when you interact with a magnet here, and this magnet through division interacts with another and creates its position, through the line of what I call, lineage ... you are connected - even in division. This is how ... in a different angle in a dynamic point, 2 E 2P , ... (2:10). How do these connect with each other, and with the others?

There is a question mark in the world of PI physics and in atomic nuclear physics, this question has been put many times over years, to number of nuclear and theoretical physicists. Maybe if you understand this you should be able to answer it. ... Through the work of the PI, work of the atomic structure, if you have a number of protons, and at same time, you have a number of E in different orbits, two points which, because of the lack of the knowledge we haven't managed to answer. This leads to another question I put years ago to the nuclear physicists.

Is the speed and weight of, (2:12). the E furthest to the nucleus, is the same as the speed and the weight of E nearest, in the first ring? The first thing the scientists tell you is, we don't know, they have not got that advanced. And the question is, is there a speed, and the

weight, or the volume bigger or the same? We call them E and we accept them as E, but one thing, which is not answered in the world of nuclear T, and never been put in to be understood, because when you don't understand, you ignore it, nobody knows that you don't understand, and you haven't understood. But now we understand.

If look at the solar system, and consider this (nucleus with many neutrons) as 1 solar (sun), we have bigger planetary system in the far end, with massively different speeds than those closer. So when you put this to the nuclear .. and physicists, they say, we don't know. But when you look at it in the macro and the micro, it should be the same. The E at the outer boundary have a bigger volume, have a different energy, the same as Saturn does. The ones closer, (2:14). have a different D too. It cannot be any different.

If you understand this, by interaction and choosing the right neutrons, you can create the right energy interference, to create the right fields as you want from it, without ever touching the center. Because the center moves on its own, it has its own interaction. These (E) are freer on their own, they can create interaction. When you understand this, a new world of Pl T and science opens up.

I gently touched on this deliberately a few weeks ago, when I explained when I was a young boy sitting under the x-ray machine, and saying if it goes through there, it goes through me, and what it does, what would I give. The translation in the Pl T is this. By controlling the center, you decide the field, the interaction of the bodies outside, and then it creates different condition. We have not understood, our science is not that deep enough, we haven't evolved to understand astronomy and cosmology and the rest of it.

But for sure we see, a lot of time they say, such and such a planets have aligned, (2:16). or this planet comes to be in that position in certain points. What we haven't measured is, what is the field radiation from this (planets aligning) interaction or this interaction. Because this field radiation has direct effect on the Pl of the center control. This is exactly like your soul inside the EC (means EU) and the reactors within it. These are the teachings for the people who become space T space center, and they can decide, and will decide how. Because the interaction of these, will create the field strength of the Jupiter. Or this will create the field strength of the moon. The STM with his emotion in the center, dictates "I want to go to the moon."

I explained before .. we enter a new cycle of knowledge sharing, into the space T, and last and this week is the beginning of understanding, both at the same time. It becomes much clearer, you don't waiting for the (2) 6th of June to fly, you understand you have already flown, the systems are there, and how it's been done. Now we can bring the two together and you understand the full understanding of the Pl T. Then when you lost this fear, you understood it, then you understand how to untangle your soul. (2:18). How to handle the interaction of your soul with the others.

Any other question.

Q: Stephanie .. from what you just said now. ... from my understanding the field interaction is what makes the HB, and what's controlling the center, you just drew now,.. does it mean controlling the center by controlling the HB. I say ..

K- You are not wrong. It's the first time you made sense in your talking.

Q: I wrote it down .. what to talk .. the first time I wrote it down.

K- This is how you can do, but you have to understand what you give to create that HB, and what to take to create that HB, and once you've done it, you have to understand what's the next step.

Q: .. because I remember .. in the Mozhan, there was the killing of the ducks. That was very traumatic because I never heard the scream of someone about to die. ... I think that is what creates .. the condition because then when you asked us to fly, and went into SF, obviously before you told us not to think ... ?? at the top the fields are away. (2:20). Easier to regulate. Not thinking means I am feeling. .. then to recreate the feelings of unconditional love ... the first thing came in my mind was the suffering of this duck, what was unnecessary. Especially after your class when you said we don't need to eat. So one thing if we need to eat, we need to kill to feed ourselves, but once I know we don't need to kill .. I thought that was unnecessary and I really wanted to from the bottom of my heart to finish .. (with the killing) ... suddenly the unconditional feelings because I wished for the end of the suffering ... a new beginning ..

I was really in that state. I remember the first thing change for me was the HB. ... Then .. I felt this force, (2:22). coming from underneath me, so that remind me when you drew the PI fields form N and S Pole.. then I felt a change in weight ... suddenly feeling very light, like my hands start to lift up .. I really felt this change of weight, Suddenly I start to lift, then become heavier again. ... my hands and legs were floating and I start to lift from the table. Obviously I started to rotate, and got scared. You told me the next day, that the rotation was only because of the fear and I ?? tilt, and force started to go out from the top, it went sideways. This is what you told me. I did felt feelings like something bigger, .. taking over. increase of something .. You said yesterday it's not correct to say the expansion of the soul, it felt like rising .. the HB is done because the G and M field at one point, (2:24). one field takeover the other ... saturated .. that is what I felt .. Unfortunately unconsciously I stopped everything. but obviously it was something bigger. I know I already talked a lot now I forgot .. I lost myself .

K- Thank you .. I think I already answered you

Any other question.

R; I do have some magnets setup here do you want me to show that ?

K- Yes ..

Q: Staphanie, one more thing .. the EU the way I see it is to take off the fear. could you say that? ... (2:26). The flight system is to take the human being to take off that fear?

K- Nope, it's your fear not the people. Okay , thank you ...

Rick shows many different magnets on his table. Mr. Keshe guides him how to move them. Transcribe just the main points. (2:28). ..

K- You have to put them separated, but close to each other. (2:30). .. Now try to bring the smaller magnets closer, near to them, very gently .. What you will see. .. take the 2

magnets which stuck together, bring them from the outside forward, and see what effects they'll have on the others. .. bring the 3 closer to the center. . you see how much closer you can go with 3 magnets stuck together. You can see the boundary, it changes, you can go closer. You see the limitation before .. the more magnets you add together the closer you can go to the center of the magnets. You are trying to go the core center, not the magnets themselves.

This in .. the PI physics, (2:32). and astronomy, shows how as we convert gases and others to matter state we become closer to the center without getting effected, or effecting us. This will bring a lot of changes in understanding of the process. You see the positioning. The totality of the PI physics is to understand field interaction and not as in magnets, in matter state interactions. ... take 2 or 3 out , stick them together and come back in the same path, just try to go in the center .. (2:34). You see if look at it in another way, the one with the 3 is like a Deuterium, its got 1 of each, it is more stable. If you understand this and go back to the past teachings, you should be able to understand the division of the M fields. If you collect 5 or 6 of them in a far distance, and you'll see how they interact with the center, without any other magnet, how they effect it, how they collect to each other.

This shows us in a very peculiar way, because you have to look at this 3 dimensional, not a flat 2 faced. Because when you hang these magnets, their behavior is very much different than on a flat board. Then you see how they interact and .. respond. (2:36). How you can use these responses to your advantage in what you want to achieve.

You have a field boundary of the center, and this .. keeps very much constant position in respect to the entities within it. In PI physics, we consider this as part of the structure. Just go towards the ring magnet with your little magnet. You see very small entity can move the bigger entity, can move the whole structure, if you push it everything else moves out of the ?? three to accommodate this field force. If you know how to use it, watch the reaction.

Go close again .. and let it go, you see how far back it goes (it was pushed a longer ways out then normal). We have shown this before, it is part of the propulsion with PI. If you put it on its own it goes different (less). If you can do it in the right way, you can create a condition of T&T. But we'll teach this in the time to come. Thank you .. (2:38).

We understood, that if we want to tap into vast energies, which is already accumulated, we go to the outer rings of a nuclear, what we call atomic structure, and the same with nucleus. If you want to convert more into the matter state you come towards the Inertia boundary field forces of the sun, for example, and you create more matters, and with it you create division of the gravity.

Even .. in the planetary system, interaction of the fields of the gravity, and M field of the earth and sun in upper atmosphere, in a free D creates the PI of whatever. When this

moves to the Inertia fields, it converts to the matter state. We have the same thing in the planetary systems, and the solar systems, and the galaxies we see the same. Then we see the density, and we enter solar Inertia, which converts the gaseous planets into the matter state planets. The same as we've seen with the others.

You see here with the Tesla increasing from 11.11 .. now we are at 11.86, some hours later, the clock is next to it. So we are gaining PI, .. field strength. (2:40). This is the understanding, that everything is the same in the process of creation. On earth the Inertia converts the PI into a matter of whatever we need, H, O, whatever, gases of it, or in the mixture of it as a water.

In the solar systems (SS) it's the same. We start with the interaction of the fields of the SS, within the galaxy, we get these big planetary system as a gaseous planet, and as they enter the Inertia FF of the Sun, in the SS, they convert the materials, or gases or whatever, into the matter state strength of the fields of the HB in the center. They become solid and they strip off their gases, and then they become just rolling ball waiting to roll in, as the internal system loses its strength or loses its field strength to the center.

There is no difference in the world of creation. It's the same when you reach at the boundaries of the plasmatic fields, and how you can change that to the matter state. Even in D of the soul, how you convert the soul into the physical condition, STP. But this time you do it, you exchanging the boundary of the soul with its environment. Where you dictate the Inertia fields FF for the manifestation of the P.

The sun and its structure of SS has a fixed what we call boundary system, (2:42). of Inertia, and you can reach any ?? but you don't have the knowledge to be able to do this, but in the interaction of the sun and the earth, in the upper atmospheres, we create the PI packages, and the Inertia of the earth converts it to the water, .. to gold, or whatever you like. It's the same with SS.

The sun has, and creates its own Inertia system, where in the boundaries, the big planets, have the gaseous Inertia. As they enter a certain zone, they enter matter state and gaseous state mixture Inertia, where we see like earth, we have atmospheric and we have the Inertia of the matter state. As you pass this line, you lose your gaseous state totally, and we see what we call, matter state Inertia planetary system, with no gaseous state Inertia strength. It's the same, no difference.

We see the same thing in the galaxies, that we see the galaxies on the boundaries behave like gaseous SS, and the solar structures on the boundary, they are like gaseous. As they come to the center of the galaxy we see the same operation. There is a certain bound depending on the gases and the Inertia, that we can create conditions like life, in the strength of it, we can even have a strength of Inertia on the other position for life. But it is all the same. (2:44).

If you look at it, there is no difference, you have the STM, and then you create the P of the man around it, and how you shape your fingers and your toes, and how you have no

bone structure when you come to the brain, where there is a direct interaction of the matter Gans state, where here to keep upright you have brought a matter state of the bone. Even your intestines, all the materials inside, and everything else is developed this way. Positioning in respect to.

This conversion Inertia, exists in all our bodies the same. In your kidneys you do the same. The structure of the kidneys is the same. It brings in liquid matter with the different things, but through the structure of the kidney, you have different .. filtering that you allow, these materials to be extracted, because you create the MG field from energy, or whatever, into the matter state to be discharged. When it manifests itself through the contact with physical condition of the body of man in atmospheric condition.

These are part of what we see in one of the teachings very recently, I explained, if you look at the intestine, and the bigger intestine when it comes out, called the colon. We have the same situation. In the intestine, (2:46). we dilute the material, to make it into the Nano material and Gans's, through the alkalinity of the stomach, not more than .. The acidity of it is for creation of current. But the alkaline-ness in the stomach creates the Gans's, and then these Gans's start floating in your intestine.

At this point they give energies, but these energies go to the body, gets used, and then when they comes to the colon, these energies, which are not needed, through the lymph system, become back again matter state, and you discharge it. We go from matter into the Gans, we share the energy, and when it is not needed, we come back in energy, and then that energy is point of reference, is rejected as a matter, plus whatever came in as, matter conversion of the Gans's.

So the knowledge is very much understood. It depends how and what you decided to manifest at this point (start of colon) in the stomach. If your intensity of the salt, or .. acidity is not there, that you cannot break up the material, which comes into a Gans, the body has no use for it, it rejects it as the way you had it. Because you didn't manage to convert it. So it comes out the same.

Means your stomach acidity is not strong enough, or your salt, what we call salinity is not enough, or right combination, to create the Gans's of that material. (2:48). You eat a pea, you reject a pea. Now go and find out what salinity is needed in the stomach, to be able to break up the pea into a Gans. Surely, it's not the acidity.

When you had a plate, you put acid on it, you dissolve, it became another matter. It only becomes an energy when there is a salt content into it. If the acidity cannot break it up, that the salt content, salinity cannot create it, you cannot convert it into energy. Then the body knows how to reject, convert back the energy to matter state.

When you look at the material in the colon, maybe 60% is coming from the waste food, 40% comes from the lymph conversion, around that figure. If you measure the exact amount of what material comes here, and what material comes here when it goes through

the colon, and just before it you'll see there is a big difference. Lymph delivers what doesn't need, convert into materials, gets rejected.

Our knowledge is not so deep enough to understand, that you'll find materials in here (colon), that we never took up in here (stomach), but we ignore it, because we don't have the knowledge. These materials (in intestine) come from that energy, which you absorb 80% from the space, in conversion to the lymph, and giving energy, (2:50). body has no ?? with it (cannot use it), but it has already become Gans's in the matter state, and body has rejected it.

These are what we have to understand a lot, and when you travel in the space. You do not put anything in here (stomach) and you just continuously convert into the energy level, then you don't have a point of reference of Inertia to convert the material, so is there a need for this (digestive tract).

Any other question.

Q: Mehranez ... I am not very experienced in lifting and mechanical things ... (2:52). I am interested in the part to help humanity through my passion. So I did experience ... I was sitting on floor on cushion ... I wanted to give a message for peace .. I made a SF, I connected to 2 people which are special, with me . I made a triangle with us 3 from distance, and this spirit ... At some time I felt like I was observing my legs but from a distance ... I was sure I am in this space. .. (2:54). over my head there was no roof, limited space grey like .. I am able to do again, I know how I did it. .. not infinite space which is grey space ... not the sky .. but space? I think my eye in this space ... What is that grey space?

K- I don't understand what you are talking about.

R: Mehranez, you want Mr. Keshe to explain what you saw ... (2:56).

Q: I want to say what is that grey space, I was there.

R: So you were there, so how can

Q:

Did I do an act of lifting?

K- I don't know I am not there. A lot of people can do this, you can create fields. This is part of it, You might feel a lift, it depends. It's very much the reactors we built, we created a condition and we'll see the position, and we go to the next steps

Q: .. just I created the condition, but it was so strong in my feeling of love

Another question, I have seen this sky or space ... (2:58). so I came back. ..

K- I can't tell you I haven't been there, I don't see what you see.

This is what we say, it depends on experience, how you understand it, and how you can use it. We have a KS who is listening ... who .. can lift himself to the ceiling. That's what he does. I think .. he claims, he does this regularly.

Q; I don't want to do it, I didn't mean to do it.

K- It's one of our well known KS he lifts from the bed when he goes to sleep, or whatever. How can he do this. what is the passion about this. how can you be in the bed and not in the bed. ... But it depends what you can do , and how you accept it, and how you can utilize it to enjoy it, not to benefit by it necessarily.

Q: I didn't enjoy it ...If I knew what that space was. (3:00).

K- It's not a space, it's the state of the energies you use to create that condition, that might give you that space, or visualization of that space.

Q: No it was not visualization it just happened

K- I was explaining this regarding the new generation of the children we'll have, through the birth of soul. These children have the knowledge, capability, ability to do things that human beings, as a physical condition can't do, and it takes parents to learn it.

I was explaining this, .. we put teachings for parents who have become and created children through the interaction of the souls, then the P, where the P follows. Would the children look like us, they are part of us. But the knowledge is beyond us. One of the games they'll play with us is what we call, going invisible. You play hide and seek by physically hiding behind a chair or somewhere, playing with the children. The new generation of the cycle of man, or universal level, they don't play hide and seek by moving. They can create fields, which passes there boundaries they become part of the field of the environment, but they still are in the same place.

I wrote this in one of the patents, read it, now we can explain it in the D of the P. You can go invisible, (3:02). at the point of manifestation, or you can stay invisible till, where you want to manifest yourself.

I was explaining this to some parents, that the new generation of the man created through the soul, we have to ask them to explain to us how you do it. Our children become our teachers, because otherwise it will be a mayhem. This is not a theory anymore, this is the reality which is with us, we have to learn it. We will learn a lot of things from our new generation of children of man.

If you want to do something, or I give him the switch, and get the things from him, he already, he's seeing the emotion of the soul, oh no, I put my hand before you move in my pocket, I keep the penny, you can't take it. This is what we learn, .. to communicate, but we have to teach them, as much more about the behavior of the man, than they teach us about the behavior of the interaction of the soul. These are realities, these are not something which will be in 10 centuries or next thousand years, or when somebody comes to be the end of the world. The children we create through the soul, especially now using the EU and the others, will give us that opportunity, to see more and more working of the soul. They shall not lie, because you can't lie, you can't say I am going to give you something else, and I give you something else, tell something else, because he has already seen the reaction of your soul, mama. Then you think to your soul, to your emotion , (3:04). I love to have that pen off you, because it can endanger you and can cut yourself, and it just gets handed over. You say, how did he know.

We have entered a new phase of creation. This is part of manifestation of Methi, understanding to create the generation that does nothing wrong. So we have to create a generation, which is created out of perfection through the soul, but they still have the

terms of P to live too. They'll still cry, run, fall, break their arms, but that is what they learn in the position of their life, what it shall be in the physical D.

What will we see if we follow, we are playing with our child, and he falls down and breaks his leg. Now we run to the hospital. But he has preset structure of the perfection, before you get to the hospital there is no breakage, did you make a mistake. Didn't we grow the toe that way, .. brain that way? Now is the understanding of the ... sciences of the new T.

Understanding the perfection in the D of the Creator. That was the gift of the birth of Mitra. This is what we got to learn, the new cycle, the new understanding. We go in the EU, (3:06). with 20 tumors, we come out with 40 tumors. But I went in there to get rid of it, how come it increased. Because in your emotion you still want to die, so you speed it up, this time. Doesn't matter you paid a million dollar to go into the machine, to get rid of the tumor, but inside I want to die, I want to live with my wife, my lover whatever, but I want to show physically I am doing something about it. Because your emotion is to die, and system satisfies the emotion.

Would you go into the system with an emotion, that I want to elevate my soul, not to die, but to enjoy the presence of the soul of my child, my lover, and then, if that is the true intention, you'll find a solution, your body will fix itself.

This is one of the biggest problems, not only for mankind. The people of the U have the same kind of emotion problems. It's not exclusivity of man, emotion. We have created a universal EU, it's universal. It's for the citizens of the U, not the exclusivity of man. So the knowledge in these systems is for UC thousands of years technically ahead of man, and thousands of years behind technically from man, but not they all have the same. This is the beauty of sharing, giving and how the knowledge should be shared. (3:08).

I hope, .. in the coming weeks, by opening of the spaceship institute, we'll bring many of you into the new institute, to be part of. To research, to bring a new D into elevation of the STM, to understand himself, then making a MaGrav and 2 flying machines, and a jackpot. In the next few weeks we'll make this announcement. Let's see how many of you will rush to be a student, .. to go and bring that change and make it public, do it in public. Because then the knowledge is shared.

KF is on the verge of bringing these things out. There is so much effort is going on in the background with many KS, in many parts of the world, to make this accommodation. KF as us has to teach us, what us have missed from the knowledge of the Creator, not one of us. Educating totality is the responsibility of the total KS. Then as we are taking man not to be below the others, it's the responsibility of KS to make sure no man is below another, in knowledge in the level of life, in the comfort of existence. We are about there.

When we declare, we've become what has been promised, we'll bring everything together, not in bits. (3:10). Everything is here for that change, and the process has started.

Q: Than you for your encouragement

K- I don't encourage you... I show you the things, you have to understand, and understand what you are doing.

Q: Yes it's knowledge ...

K- It's just knowledge pure knowledge ... Knowledge is love, if you share knowledge you're already in love, because you share your love you don't keep it to yourself.

Q: ... I have made a SF with one 4 corner with different triangles. ??? one with 5, then I could get the soul of the group from a distance. I could get into the soul of something related to the group. Is it possible to make 5 or 4 triangles with different people at a distance, and then get the knowledge, the thing of that group. (3:12).

K- We did, you saw the picture there .. of the 129 Tesla unit we did in the Inzano. You see in front of you an orange frame ... On this machine is a specific platform, it's one of the first dynamic reactors SF which was made from Cu by Armand. After we finished testing the 129 Tesla we dismantled the structure for another test.

We took this one into a separate room in the building. It was positioned in one corner of the room, and .. we tried not to get anyone to go in to disturb it, and we ran this one ... We monitored it clockwise, we put dust on the floor to see how it moves, and it was how much it moves from the ground up and down. Yes this is the unit. No this is another one, no .. (3:14). ... This was changed to a different structure of it ... This unit in Christmas of 2014 was positioned in this room, and there was another SF in German and Canada.

Collectively we decided to stop one of the engines. We stopped that engine where it was decided by 2 people. You have to understand these MaGravs were running for quite some time. .. for weeks. In that instance we were in communication with Elya Kostova, and me online we decided we stop reactor #2 on right hand side of the system in the Inzano, within seconds the reactor came to a halt. It's videoed somewhere. We have the video of it. We restarted it, again on the line Dr. Kostova was in Bulgaria. We decided instead of choosing another reactor we used the same. I asked her to follow it we bring it. For the second time again we stopped reactor #2. (3:16).

We showed through intention, through the work, we can do, connect, we can create that condition. The same is, if the intention is there, you work in the D of Pl Gans's, because these reactors were filled up with Gans's. You can interact and create that condition. So you can interact with anyone, if you set to do it and do it the right way.

In a way, we showed the expansion of the emotion of the man to the D of P. Yes you can, it has been shown. We all have the ability, it's not exclusivity, it's just to understand it.

The new generation of the children of man have that ability. You cross the road, and suddenly a car is coming, and a person is running, they will have the capability to stop the person before the car. They have the ability to inform the emotion of the soul, to retract the body of the man. It will be amazing, when the population of the man understands this process, how much there will be no need for a lot of things. Yes you can, you can tune, you don't need 3 people, 10 reactors, 20 groups, you can, (3:18).

But you have to understand the limitation of. You cannot steal, you cannot interfere, you cannot play with people.

Q: no, no, no. absolutely not that ..

K- No, it's , the only thing, no. The only thing which can happen, is for you to give to elevate their knowledge, their soul, or if you are lacking, and they give for everyone to have it, then you receive part of that knowledge.

Q: Yes, it is for giving.

K- But, as long as it is done. You have to understand, you are not dealing with what I call, all the voodoo and black magic. You are dealing with the science of interaction of the fields. In this understanding we have to understand all possible parameters of it.

It's very simple if you understand, what Rick was showing in the magnets. If you create a condition of a set of magnets in the right way. You can create Potassium (K). If you create that K field, it is in a plasmatic condition, and if you put it near the body of the man, if it is short of Ca (means K) it will take from it. But you have to create the condition of the Pl through Nano T, to be able to have elements free to do so. This is why when we made the Cups and the Belgium's accused us of, "it's nothing but a bunch of magnets,"

When you don't understand the principle of the Pl, the interaction of the fields, man carries a matter state plasmatic fields Ca (K) in the body, (3:20). then of course everything is nothing. This is one of the things we understand. Now you have the possibility to work with Gans's to create condition of fields, but in the new T we have changed that into the STM, now your soul can play the game, can be part of, but cannot steal from. You cannot say, "I give to you to have." I don't want it.

I have a battle with a KS in a very silent way. "I want to die," but on the surface "I want to live," show I am doing everything to live. But have not understood, that there is another way to it. I want to be with the soul of. Allow me to be with the soul of. Then I don't need to kill myself to be. Maybe the soul comes to understand and be part of. This is what we see, .. comes off, .. what sits in the background of the emotions. Working through emotions, when you work through emotions, you decide what fields you release, and you decide what fields you want to accept. It's the prejudices, which we have created for ourselves, which damages us and hold us ??

I said this to a couple of KS .. parents who elevate there souls to create the children of the man, through D of the soul - watch it. (3:22). You are going to have a fun time, because you'll learn from them. You learn new way of communication, .. playing games, .. interacting, .. of looking at life. It takes time to change.

You have to find another child, which has been born through the STM, and then let them, see how they play. Would they laugh, but you wonder they don't talk, is there something wrong with them, are they going mental. They don't need to, they already exchanged the joke in the D of the soul. You see both of them without saying anything, running to the

same toy, and one waits for the other one to enjoy, then takes. You won't see crying, "I want it to," because letting the other one enjoy is more important.

We created a new cycle of life on this planet, and it had to be done through the STM. We had to create what we call a new generation, to get rid of the old generation in time, that it changes, and maybe they understand. Interacting through these kind of things, but understanding it is important.

Q: These kind of things have been in esoteric science of Tibetan and Buddhists and things like that. There has been such things before.

K- Yes, but we never understood the science behind it. Now we understand. We can explain the science, and we can create scientifically a system, that gives us that.

We can create emotion, that anybody goes into a machine, will cry. Through the plasmatic fields, (3:24). we can make systems, that anybody can goes in, comes a happy guy out. You understand. But it's a science, not one man could do. You know you go to someone and he says, oh he puts his puts his hand, on the foot of someone and they walk. That hand, what would your hand do? Because his field is at the strength.

In 1991 a partner of mine, has a famous, he was well known, when he puts his hand on somebody's pain, it helps and gets better. I had a broken ankle, and I walked into the office, he said, come on Mehran sit down, I help to get rid of your pain. Our secretaries and friends said, it works with us, we don't have a pain. He put his hand on my knee and I had more pain then I ever knew. I said, "you came here to help me." Because I wasn't prepared to accept. Or was the intention to help too much. Now we understand, we have T and can do. We have understanding we can do. Now it doesn't need somebody from Tibet. A man from Africa or Brazil or England can do the same. Because it is technical, we understand it and replicate it.

Q: ... Sometimes we keep ourselves to the things, if the person doesn't understand they have bad judgments.

K- Haven't I changed. For years I just sit and wait till they understand, 7 billion of them. Learn from me. (3:26).

Q: .. Just one more. this making soul to soul child. There should be a limit of age for women?

K- No, no

Q: Yes, because the physical part takes the soul of the body to make it.

K- No, no. You still stand a chance, maybe a hope. It is to understand that children made by the STM, do not rely on the presence of parents for life, because they know the soul of the parents are with them. In the D of fear of dying, and this is important.

Q: Where does it grow?

K- It still grows. It will be an interesting time coming .. a lot of people need to learn gradually and go ahead.

Q: Azar, .. regarding the magnets Rick presented. If you take everything as a magnet, 7 billion of us, each of us moving in certain ways and directions, .. changing each others directions. Especially the leaders right now. When you look at the leaders, so they have a field, but there are, (3:28). say 100,000 of them, and 7 billion of us. Now we have a U Council, that is connected to the soul of each language. So even one UC has so much power, because when you move, you change the position of the leaders, for sure can change, for better. For sure, it's just understanding and moving them in the way, that you want to move them. Am I correct in what my thoughts.?

K- What do you mean ?

Q: .. you move 1 magnets ..

K- Yeah, you see, but this is the problem with observing it this way. Observe which other magnets didn't move. Observe, you see this is the P of man looking for things. If you look at one magnet moving, and the other magnets move or don't move. Look at why didn't the others magnets move.

Q: Because the other magnets I come into an empty room say I am angry .. I bring my fields into the room ... your kind of field is going to change for sure.

K- Yes, (3:30). because it's an emotion. It's an interaction of the plasmatic fields. Why a mother when picks up a child, which is crying, she cries herself as well with the child? Does she feel the pain of the child, or is it what kind of mother I was, that I couldn't protect my child not to get hurt. How many times as parents, we've been there. We blame ourselves for the condition our children gone through. But what is the other way to look at it. Wasn't there a cycle for them to learn something, and us to learn about ourselves in that emotion?

Q: If we saying that, so it means 7 billion of us, and we have a UC, so in the process of it, we also have our position, what we are learning on this planet individually,

K- Of course.

Q: in collective with the rest of. I am connected with, which they are learning individually, what they supposed to learn, so that UC is actually connected to all the, say Iran has 85 million population, I am connected to 85 million people who are having their own way of living.

K- Plus the duck who understands Farsi, plus the cat, .. bird, and everything else. This is not the exclusivity of man. And then I put you another fact, it's really a fact, what about the soul of the birds which migrate from one continent to another, which of you KS, what I call UC, (3:32). members are responsible for them? They travel from the Russian speaking, into the French speaking somewhere in the Middle east. What happened to them, which language speaking of the creatures of the U speak, that we are responsible for, but it could be the same as French?

Q: .. That's why when see things happen .. of course you have an intention, things happen in a way, although it can be bad, you have to let it happen, because it has to go its course. When it goes through its course, it is completed. So you are free of it, because each thing has to find its way, and its finished. This is beautiful ..

K- Of course it's beautiful.

Q: Now I understand how your behavior. I understand your behavior now.

K- What do you mean?

Q: .. to what things comes your way, like the problems that comes your way. The way you react and handle it, is you allow it to finish its course, you don't stop it.

K- Yes

Q: For example if I am doing something bad, you'll let me finish it, because I am done with it , so you make me go from my agenda which was my intention, but I am good now, because I become somebody else, that finished that process, that learned from that experience, you allow people to do that. Because when you allow people to do what they came to do, you allow them to experience it ?? and go to the next level.

K- It's you. This is what I keep on saying. .. a lot of people tell me, why don't you do this when you can. Why can't you do this, (3:34). if you have the knowledge. Why can't you create all the gold in the world, that you don't need to ask for KS bla, bla .. What I say is very simple, we are here to experience it, once we experience it, we understand it.

This is the whole purpose of here. "Oh, why can't you do, stop yourself, breaking your arm or falling or whatever." That fall, breaking arm, it brings experience in the physical D, we need to understand how to sort something (out). We have to feel it.

I heard this so many times ... people telling me why don't you stop this, or do something else, or whatever, and do you have to experience it? Yes, because it's like point of maturity.

Q: .. The same thing with last year thing, what happened, you already knew it for many years, but you didn't act on it, because you let it go to the time when it completed.

K- What do you mean?

Q: The thing happened with somebody who was in KF was so close to you.

K- We know these things, we have to experience it.

Q: So you let it happen, you let it go to the pain of id, even though you went through the pain of it, but you went through it, because it was just the way you see, it has to happen. Because you didn't want to, because you could have stopped it in the middle, (3:36). when you knew it. But all you did was constantly supporting of that person, you gave them so much love because ..

K- Because you have to, you have to ...

The only thing is when it comes to a point that what you give, what you put is not, what I call, accepted. You can forgive a lot, you can close your eyes to a lot, but when people don't understand, and they carry on with the same thing, you leave it, because it means they are not ready to receive.

It's like our children we close our eyes to a lot of things they do wrong, because we love them so much. Then there comes a point, that's it, enough is enough. It's a very human interaction relationship.

Loving someone doesn't mean you have to accept, or there is a limitation to accept. We never stop loving, it doesn't matter who. There is still a level of love and care, doesn't matter, what the reason you fall out with your lover, your wife, children, your neighbor. It's not an end, it's not Italian roulette.

You know in Italy you have a relationship with a neighbor for 10 years, and you have given each other a lot of things and gifts, and things, you know, have a pot I don't need, have my fork I don't need it. When they breakup the relationship, no more, they put all the pots and pans, knives in a box and leave it outside the door. It's finished, I don't want anything from you.

It's not that way. What happens when you have that pot and you cooked from it for some time, (3:38). and this time you want to cook, you need that pot, you say, "oh, shoot, I should have never given that pot back to him, did I." It happened to us in Italy, I can tell you exactly how they do. It doesn't matter how long we had the relationship with them. What they gave you, whatever. They put, when they really want to finish the relationship, they put everything outside your house, and that's it.

But they got rid of the P presentation, but have they got rid of the emotion of it? That's a different point. What you do is you keep the pots and you pray for them, you give from your soul to elevate them. One day they knock on your door, "can I have that pot please." Can I have the whole box, because all the memories are in it.

It's not a teenage love affair, where you got the teddy bears, you gave a teddy bear, then when you breakup you open the door ?? ?? and throw the teddy bear over and out. That it is finished.

What about every time you drive down that road you remember that teddy bear going out of the window. How many of us have done these things, it doesn't matter with whom or what in our lives. It's we learn and we progressively learning to give, to be there. It's not you accept, and then it's a point you cannot accept anymore, because it's not learnt. You've been taken for a fool for a long time, doesn't mean you'll stay a fool.

What you referred to, we'll open this book very soon in a very extensive interview. KF has to know, (3:40). exactly what has happened to the KF and doesn't matter it is part of my private life. Very soon in a live interview which is setup, we open the totality of what happened. With no accusation, with direct data, direct information, very soon.

Then you as KS understand how you have to live my path. What it brings you, because if you allow it to carry on, it creates a wrong image of the structure and love and care, and we are there to protect, care and love. It doesn't matter who.

It's important for us to see what effects have been to us, afterwards. What are the changes in our lives, what positive results. Or was it the reason for us to be there, where we are today. That's how it is, that level of whatever, has brought us to be so knowledgeable, so extensively understanding more of what it is, that we share. Be it in our lives, be it in the history of our nations, .. this planet.

We killed and killed and killed, and destroyed and killed, and now we had enough. We matured. It was a little bit short of stopping, and it needed the collective energy of the

whole members of this planet, truly, not by building a UN and creating more war. (3:42). But building a UC, and extending the love of the Creator to members of the world leaders and the rest.

This is the process we learned. Now we see how they are tackling it to start a war, but none of them is prepared to fire a gun, because they want to find a solution. We might see a war in Ukraine very soon. But would it be the way we think it will be? Or is it a push, another political way?

What we need is a member of the Russian speaking. A member of the UC from Russian speaking language, and from Ukraine to be part of the UC. If those 2 souls can come to an agreement, the nations and the governments in their whole structure will come to an agreement. It's a very strange position to understand, but it is what it is there too. It's evolution of the knowledge and maturity of man.

Any other question.

Q: Ed .. First I just want to thank you for all you give to us. The way you present the knowledge to us is just such a proof to me of who you are. You always present us the next step, (3:44). in knowledge to expand us, to consider what we never even considered before. But yet at the same time, you can relate to us on the level of humanity. ...

My question is .. the transmutation of the energies of our soul into the energies of the STC. I was just wondering .. what are the limitations that hinder that, or the ways to advance that. Is it similar what we go through now with trying to relate our STP to our soul, where we deal with emotional attachments, or is it just an interaction with more environment as we branch out into the U, or is it both, or what?

K- I don't understand what you mean exactly.

Q: I am just wondering the process of the transmutation of the energies of our soul into that of the Creator? What is it that might hinder that or advance that?

K- Ourselves, understanding the work of the soul, understanding the truth about the creation.

In the process of the teaching, in the past couple of years, I have given you a lot of hints and knowledge how to achieve it. But you always looked at it from the man point of view, not from achieving the STC.

You always looked at it, how can I get my soul out of my P, (3:46). But you never looked at it, how can I go within my soul, that within it I found the Creator. It's the habit of the man, we are always greedy, we think, it comes if I go out, you never look at the fact.

In many teachings I referred to, as you go to the center of the Pl you find the strength of the creation. Nobody understands, you always looked to, what can I do to get to that. Look within, you'll find the love and the Creator. But how clear are you to look within, with yourself and the knowledge and understanding the knowledge.

It's a very simple thing. I explained this before. You can go on top of a skyscraper and jump off to get down faster and destroy yourself, or you can get on an elevator and come down, and enjoy every floor, what's in it, but you know at the end you get to the bottom.

It's understanding ourselves within, not expanding the soul to reach. The more you expand the soul the further you get from the point. As I say, look within and you find it. And what you find is the beauty of the creation and the Creator.

You don't need to release the soul to find it, within the STM can reach that point. But that is the level of understanding, how much we can do it, and understanding the science of why we do it, the reason we do it, and what is the next level.

We are not a cult. We are a scientific organization and with it, if I create a denser, I create a much stronger fields, (3:48). I can travel further distances to further points of the U, faster. Is that distance, a faster, reaches the distance from my soul to the Creator, and to bring it to zero time, that I become part of it. This is the whole purpose of these teachings. But with it we produce some toys for you to play with, MaGrav, flight systems and the rest of it. It an old saying, I always said, "I came to find the Creator, I found the Creator within me," that's the point. If you reach that point you mature to the next one.

Q: So in going from point to point, does our soul have attachments, or is this all in our P?

K- We are connected we are not attached. You saw those magnets, even they come together, they are not attached to each other. The matter state is connected, but the M field sits, is flowing through them. They are line of connection. It doesn't stop where the MaGrav touches another magnet, the field don't stop going through them ...

Q: So our experience is all connected, our soul and STP, they each effect one another?

K- Yes, they operate through each other, not effecting.

Shall we call it a day .. (3:50).

I hope we learned a little bit more, we shared a little bit more, try to stay humble then you understand, and you achieve a lot. Thank you When you look at this craft which is as a diver here, remember there is one in the Linz center, which is gaining from the D of the U within. It's putting weight on, It won't get fatter, but maybe become knowledgeable, and then we'll see what we can do with it. .. It won't increase in size, we have to measure the field around it one day.
